

John H Hansson
La Perm Cat Club. Saturday 3rd April 2016.

Many thanks to Lynda & Committee for the invitation to judge at this part of the combined shows which I am sure was a mammoth task to organise, so thank you to all concerned in whatever capacity. My sincere thanks to Linda Whitmore who acted as my steward & worked really hard across all sections & did a fine job of it, my genuine appreciation. Some of the beds, which may well have looked comfortable for the cats proved a major issue in removing the cats from their pens, this was further compounded by number whose nails were like lethal weapons, a consideration if you want the judge to be able to assess your exhibit, worth considering!

AC La Perm Adult;

1st & CC NICHOLS'S GLASTOCATS SILKY SPRITE. LPL j 02 32. 14-05-15. TCR Lilac Tortie & White Longhair, very pretty miss, who is still looking a little more immature than I would wish in head development but otherwise she was well grown & in keeping with her age. Moderate slightly wedge showing some contours & quite good prominence to the whisker pads, slight, rounding to her brow, hint of rise at the eye line, her chin tapered a little, bite was good. I would prefer her ears a little larger & she pricks them a little high, need a little more angular setting, some light curly to the interiors. Her eyes were quite a large full almond shape, her pupils were very dilated & no points anyway for the colour. Whilst still some maturing to achieve, she was nevertheless, beautifully firm & she has slender legs with dainty paws, her tail has a loose plume like effect developing. The coat loose springy effect, which parted with a breath & was very airy, her curl was loose & unstructured throughout with a pleasing softer texture, some curl to her whiskers & eyebrows. Whilst I fully appreciate there are no points for her colour it is worth mentioning that hers is actually an attractive combination. Her temperament was charming, her condition excellent.

Considered for & Awarded BOB. LOVELL'S CH CLOUDBORN SPRING TRA-LA. LPL n 25 30-05-13. Brown Ticked Tabby Longhair, much more mature & as a result more finished. Her head is a marginally shorter length wedge in relation to its width, with pleasing moderate gentle curves, her muzzle has pleasing prominence & has a gentle curve to the cheek line, profile has a very slight rise at the brow, firm chin, level bite. Ears again I'd like a little larger though the tufted tips create the impression of being larger, require just a little more width ideally, slight curl to the interiors. Eyes larger size, wide almond, light green tone (should anyone be interested). Her body is well developed marginally too much so, as she is a little more rounded in her waistline, her legs are proportionate & paws oval, her tail I'd like a little longer, loosely curled with reasonable plume like effect. Coat length was good & it has loose unstructured curl throughout, with a very pleasing springiness to it parts easily, it also has the benefit of some soft ruff round her neck the texture is good & is not too harsh. Condition was excellent, temperament very composed & dignified.

AC Titled Adult;

1st LOVELL'S CH CLOUDBORN SPRING TRA-LA. LPL n 25

End of Report.
