

## **Mrs S Heavens – Shorthair Cat Club of Scotland – 11<sup>th</sup> April 2009**

My thanks to the show managers for the invitation I had a lovely weekend in Scotland with glorious sunshine, and some lovely cats to judge. Thanks you to Linda Johnstone for stewarding for me she handled the cats well and was very pleasant company.

### **A.C. BRITISH IMPERIAL GRAND PREMIER MALE**

1. I.G.P.C. GORDON'S GR PR BEAUNOVEAU SILVERCROWN (40 4) MN 09/06/03

Lilac Colourpointed. A lovely friendly boy just a little baby faced, nicely rounded head with wide top, well set but slightly large ears, expressive round blue eyes, small round cheeks and muzzle, level bite and firm chin. Good size and weight to frame with short thick legs and firm round paws, lovely coat for length density and texture. Well defined mask and points, the hall light made the pinkish huge required difficult to access, clear ivory white body colour, balanced length fully coloured tail.

2. Res I.G.P.C. McCOLL'S GR PR BRITARD SEYMOUR (40 7) MN 23/04/09

Cream Colourpointed. A huge teddy bear of a cat with an laid back nature, fairly round head with good breadth of skull between slightly large ears just a fraction wide to the base, lovely well opened round blue eyes, short straight nose, not overly large but round cheeks, fractionally square muzzle, level bite and good chin. A large very well filled frame bordering on the rotund, held up by thick short legs with firm round paws. Good coat for length a little lacking in texture, clear definition to his mask the points are rather indistinct, there is some body shading, medium thick tail with pointed tip.

### **A.C. BRITISH IMPERIAL GRAND PREMIER FEMALE**

1. I.G.P.C. CARRUTHERS'S GRCH & GR PR SCOTKITZ VISION IN BLUE (16) FN 09/11/99

Blue. A very pretty girl who had a cross look but was in fact super natured. Super apple shaped head with wide top between neat ears that are just a fraction large. Expressive round light orange eyes, short broad nose with full chubby cheeks and well rounded muzzle, level bite and fair chin. Cobby body well filled and bordering on the unbalanced with thick short sturdy boned legs and large round paws. Mid blue coloured coat with good density, a little soft in texture with some scurf to the base of her tail, which was rather short in length with a pointed tip.

### **A.C. BRITISH CHAMPION MALE**

1. G.C.C. HOLDEN'S CH OSOCOZI L ALBIE DELVES (40 13) M 23/06/07

Chocolate Tabby Colourpointed. What a sweetie rather shy but with a lovely purr, well rounded head with wide top and neat well set ears, he has a rather heavy brow line which hide large round eyes which are a good blue colour. Short broad nose full cheeks and rounded muzzle, level bite and good chin. He has a compact frame and is a touch lightweight, perhaps he's thinking of amour rather than food. Lovely short dense coat with good texture, well defined mask with clear M to forehead and spectacle markings, points also have good definition with rings, balanced length tail with rings and rounded tip. I gather he was made up today, well done he's such a charmer he deserves it.

2. Res G.C.C. MACLEAY'S CH KRUZINKAL ENIGMA (40 7) M 13/12/07

Cream Colourpointed. Another super natured boy maturing well, well rounded head with good top his ears are just a fraction large, not helped by him holding them very upright. Large round blue eyes, short nose with rather a dip when viewed in profile, his cheeks are filling and balance this well, rounded muzzle level bite and good chin. Good size to frame again he is a fraction on the light side, his coat has good density but is a fraction on the long side and it was this that swung the balance on my awards, clear definition to mask and points, there is some body shading, balanced length tail showing some stud tail to base.

**A.C. BRITISH CHAMPION FEMALE**

1. G.C.C. PROUT'S CH SKELLUM ANNIESTREASURE (31a) F 30/07/06

Blue & White Bi-Colour. A pretty girl but a fraction on the moody side, round head with smooth top and lovely neat small well set ears, large round deep orange eyes, short broad nose full cheeks and rounded muzzle, level bite and good chin. Nice compact frame with deep chest and short sturdy boned legs. Lovely short coat with good density a mid sound blue and sparkling white, white blaze to face, a full white collar, white to legs and stomach, she has a blue dot to her chin, balanced length fully coloured tail with rounded tip.

2. GRISS'S CH GRISELIAN DROPDEADGORGEIOUS (30 ) F 16/10/07

Brown Spotted. Now this girl had a gorgeous nature, she just needs a bit more time to mature, head rounding well with fair width between ears that she holds forwards and are a little wide to the base. Round eyes a nice orange colour, short straight nose, her cheeks need to fill and she is a little square to her muzzle, level bite and fair chin. Good size and boning to frame, short coat with good texture it is a little cold due at the moment to some greying at the roots, the spine line is rather linked but she has great separation to her side spots, balanced length ringed tail.

**SELKIRK REX MALE**

1. I.C. B.O.B. JOHNSON'S CATBALU CAIRNCATS-ROLO (79S 31BT) M 18/06/08

Chocolate Tabby and White Shorthair. A super natured boy, round head with fair width, medium sized ears with good width to the base and cute tufts to the tips, large expressive round eyes a deep orange colour. Short broad nose with downward slant, he has good width to his muzzle but it could be more rectangular in shape, level bite and good chin. Lovely size and shape to body with thick well boned legs and large firm round paws. He has lovely markings and a super rich chocolate colour, his coat is thick and dense with at present just the hint of curls starting to the ends, medium length tail thick at the base and rounded to the tip.

**SELKIRK REX FEMALE**

1. I.C. W/H JOHNSON'S CATBALU CARNICATS-SPICEY (79S 15K) F 18/11/08

Cinnamon Shorthair. A shy girl, she is a lovely colour, I am sorry to say she has the wrong head shape, it is of foreign type and a long wedge shape is the only way to describe it, lacking to the cheeks with a long straight nose, her eyes are oval in shape with a slant to the side, level bite with rounded muzzle and lovely curly whiskers, her ears are small and lacking hair to the base. Long thin body shape with very light boning to frame. Her coat is a gorgeous rich cinnamon colour, lacking density but with distinct curls coming to the ends, balanced length tail covered with rather fluffy fur. I.C. withheld due to lack of type.

**BRITISH A.O.C. SILVER TABBY NEUTER**

1. P.C. W/H LEE'S SODACHICATS ANDROMEDA (18d) FN 02/09/07

What a sweet natured girl with lovely type, nicely rounded head with medium width between well set ears, round deep orange eyes, short straight nose with full cheeks and rounded muzzle, level bite and fair pale coloured chin. Compact body shape well filled with short sturdy boned limbs, short dense coat a deep rich red with clear tabby markings, M to face, butterfly to shoulder, separated spine line, well matched oyster, legs bars and rings to tail. Her only fault is she is not red silver in colour, which is what she is registered as so hence why the certificate had to be withheld, once she is re-registered I am sure she will do well.

### **BRITISH RED SPOTTED NEUTER**

1. P.C. B.O.B. DEMBSKI'S CH BAZBRITS SPOT ON (30d) FN 23/06/99

What a purr, this is a seasoned shower who enjoys her day out and so knows how to charm the judges. Super round head with wide smooth skull between slightly large ears, lovely large round deep orange eyes, short broad nose, full fat cheeks, rather square to her muzzle, level bite and good chin. Very large frame well filled and bordering on unbalanced, short coat a little lacking in density, a super deep vibrant red, lovely definition to side spots, the spine line is a fraction linked, balanced length tail showing rings.

### **BRITISH BLACK SILVER SPOTTED NEUTER**

1. P.C. B.O.B. SOUTHALL'S PR CADIFEE ABUNDIUS (30s) MN 12/08/02

A large sappy lump is really the best way to describe this boy, I bet he is a joy to own. Huge round head with wide smooth skull between ears that are just a fraction on the large side. Large round eyes with a fair green colour, short broad nose, full fat cheeks and rounded muzzle, level bite and firm chin. A huge frame which is very well filled, held up by short thick legs with large firm round paws. Short dark silver coat with clear dense black markings it is a little lacking in density, good facial markings, fair separation to spine line the side spots are a little linked to the shoulder and thigh area, better to the centre. Balanced length ringed tail.

### **KORAT ADULT**

1. C.C. B.O.B. EDWARDS'S CH KOORAHK ROSY (34) F 4/03/07

A korat is nothing without attitude and this girl has bucket loads of it and for me therefore irresistible. Good outer heart shape to head the inner one is developing well, she has large ears with a good set but when she screams at you she does have a tendency to splay them side wards. Lovely large eyes with a good green colour developing, short nose with slight downward curve and little bump to tip at the moment, her muzzle is developing but needs to fill more. Dainty framed with good muscle tone she is filling out well. Medium coat a dark blue with silvering only to nose and paws at the moment, balanced length tail a little thin.

2. DAVIES'S PERSEPHONIES SKY (34) F 26/03/08

A real friendly girl, I don't think she has been out much and certainly hasn't done the course on attitude. Heart shape to head developing with breadth coming across the eyes, these are large but being a sappy girl it was hard to get her to open them fully and give us the alert look, the green colour is developing well. Short downward curve to nose, rounded muzzle and fair chin, medium sized with good muscle tone and well boned legs with oval paws. Short dark blue coat with silvering only to nose at present, balanced length tail. With time I think she will be lovely.

### **DEVON REX KITTEN**

1. B.O.B. RITCHIE'S NOBILERO DORCASMAGYAR (33a 36) F 20/09/08

Black Smoke, what a poppet I could have taken her home. Short broad wedge with high cheek bones, large eyes that are oval to outer edge a little round to the inner edge. Rather rounded to the brow with flat skull coming between large ears, short nose with a definite stop, her whisker break needs more definition, level bite her chin slopes slightly. Lovely sized body with firm muscular feel, very elegant neck, slim legs with small oval paws. Her coat is really just a rather fine down she has that wonderful warm feel to her stomach, you could just hold her forever. Long tapering tail fully covered.

**DEVON REX NEUTER MALE**

1. P.C. B.O.B. SINCLAIR'S CLOUDBORN KITERUNNER (33a 30d) MN 01/04/08

Red Spotted. Short wedge with nice high cheek bones, rounded brow curving back to flat skull between good size ears with width to the base and tufts to the tips. Oval shaped eyes sloping to outer edge, slightly long nose with only a slight dip rather than a stop, his whisker break merges into his muzzle and needs more definition but has cute short chewed whiskers, level bite and fair chin. Good size to body with slender neck and solid muscular feel, super short soft coat covers all of his body with well defined ripples, very long thin tail covered with short fur.

**DEVON REX NEUTER FEMALE**

1. P.C. McRAE VELVEREX COIMHLION (33a 30f) FN 26/11/07

Cream Spotted. A feisty girl with very wicked expression. Short broad wedge with high cheek bones, curved brow with flat skull between ears that have a good set but could be larger, she has a slight nick to her left ear so she obviously is fairly feisty most of the time. Large oval shaped eyes with slope to out edges of ears, short nose with only a slight dip rather than stop, not bad definition to whiskers break which has short chewed whiskers, level bite and firm chin. Good firm muscular body with elegant neck and slim legs with small oval paws. Short soft coat covers all of her body with curling to side and flanks, long tapering tail covered with short fur.

2. MAITLAND'S CLOUDBORN LARK RISE (33a 31dt) FN 01/04/08

Red and White. A little upset today, short broad wedge with high cheek bones, lovely large wide set eyes an oval shape and sloping to outer edge of ear. Rounded brow and rather narrow flat skull between medium sized ears, these are wide to the base but could have a lower set. Short nose with a slight break but this needs more definition, as does her whiskers break which has short chewed whiskers. Level bite and firm chin. Slender body with good firm feel, elegant neck and slim firm legs with neat small oval paws. Short soft dense coat covers all of her body with ripples evident only to her flanks and legs. Long tapering tail covered with short fur.
