All Persian LH Tabby must have at least one parent with the Agouti gene:

Agouti breeds: Tabby 7-7j, 8-8j, 9, Chinchilla 10, Tabby Bi-colour 12a1t-12a10t, Tabby Point 13b11-13b20, Cameo 51, 51a-51j, 52, 52a-52j, Pewter 53, 53a, Golden 54, Shaded Silver 55, Exotic SH Variant 70/18v (Black Silver Tabby) – 70/18Jv (Lilac Tortie Silver Tabby), 70/30Sv (Black Silver Spotted Tabby) – 70/30JSv (Lilac Tortie Silver Spotted Tabby), 70/19v (Red Tabby) – 70/20Jv (Lilac Tortie Tabby), 70/30v (Brown Spotted Tabby) – 70/30Jv (Lilac Tortie Spotted Tabby).

Full Register: Persian LH Tabby offspring of Persian LH Tabby to Persian LH in approved colours. Parents, grandparents and great grandparents to be listed in Full Register Column.

Supplementary Register: Persian LH Tabby offspring of two Persian LH, or Persian LH Tabby to Exotic SH variant in approved colours listed in Full or Supplementary Register column or where one or both parents has Reference Register Persian LH or Exotic SH variant or Exotic SH within three generations.

Experimental Register: Persian LH Tabby offspring with Preliminary recognition of Persian LH parents listed in Full or Supplementary columns.

Reference Register: Persian LH Tabby offspring where one or both parents are a non-recommended Persian LH or Exotic SH variant. Offspring may be registered as Persian LH Tabby only when the preceding four generations is from the Breed Section, Long Hair Persian Type. Only cats with the preceding four generations from the Breed Section, Long Hair Persian Type, may have their offspring placed on the Supplementary Register if they are mated back to an approved Full Register Persian LH.

For further information please contact the Secretary of the Longhair Tabby Breed Advisory Committee.
