

JUDGE: Mrs. Rosemary Fisher

SHOW: Short-Haired Cat Society

DATE: 12th April, 2015

A very busy day, so I was grateful for the calm and able assistance of Caroline Turner-Russell. Thanks for your patience and help Caroline.

BRITISH RED, CREAM OR AC TORTIE TABBY ADULT

1st, CC & BOB Bujalska-Axon's Delphinium Fleur De Lys – Tortie Tabby

This girl is a week short of her first birthday, she has a very nice round head. Her ears are quite well set but just a bit obvious at present, hopefully this aspect will improve as she matures. Her eyes are round and well opened and a good bright orange in tone. Short broad nose set in a round face, good chin and level bite. Good cobby shape, well boned legs and round paws, tail just a fraction short. She has a really glorious coat pattern, with a very well defined classic pattern visible over her whole body, beautifully interspersed with patches of shades of red. Her coat is short and dense and very well presented. A most attractive young lady, shown in excellent condition.

BENGAL SNOW MARBLED BLUE-EYED FEMALE KITTEN

1st & BOB Goodger's Soostee Gaudette

Eight month old girl of very good size and conformation. She has a broad, medium wedge, slightly longer than wide with high cheek bones. In profile she has a gently rounded brow with a slight concave dip at the bridge of her nose. Her nose is broad with a deep pink leather outlined in brown. Her ears are medium sized and wide at the base nicely set just to the side of her head with thumb prints to the backs. Out of the pen her eyes appeared rather round, but relaxed back into a more oval shape when she went back into her pen. The colour is a good shade of blue, but her pupils were rather large and obscured the colour somewhat. She has a nicely rounded broad muzzle and firm chin with a level bite. A strong neck leads to a well built, powerful body that is muscular and firm. Medium length legs that are well muscled standing on large, rounded paws. Her tail is medium length and thick. Her coat texture is soft and dense, just a fraction long. Her ground colour is creamy ivory with the desired pearl dusting. She has spectacles to her eyes, and M to her forehead and streaks running over the top of her head from a scarab. She has a clear marbled pattern in brown that flows nicely along her flanks and is well contrasted to the ground colour, her tail is well ringed in darker brown with a solid dark brown tip. Hint of spots to her belly. Her legs show both stripes and spots, right down to her toes. Very amenable girl to handle, she was shown in excellent condition.

BENGAL BROWN SPOTTED MALE KITTEN

1st & BOB Jones' Towanreef Rossi of Leopardsview

Broad, medium wedge. His ears are small, wide at the base and have rounded tips. In profile he has a gently curving forehead, with slight dip at the bridge of the nose, large nose with puffed brick red leather. His eyes are oval in shape and hazel in tone. High cheekbones, nice full muzzle with spotted whisker pads, strong chin and level bite. His head is rather small in proportion to his body. A strong, muscular neck leads to a sleek, muscular body standing on strong, medium length legs with rounded paws. His tail is medium in length, thick with a rounded tip. His coat is short, and with a good soft feel to it. The ground colour is buff, and he has good facial markings and a scarab to his head, strong chin strap and broken necklets in dark brown and a well spotted belly. He has pale fur to his lips and chin, and is paler on his underparts. His body shows some large rosettes and also horizontal streaks to his shoulders. His legs are nicely ringed, as is his tail ending in a black tip. A well grown boy, very nicely presented.

SINGAPURA NEUTER

BOB Halewood's PR Jayshelm Schubert Legacy

A handsome boy of very good size. He has a nicely rounded skull with large, deep cupped ears nicely set with salmon tones to the back of his ears. Super large, luminous green eyes that he uses to great advantage. He has a medium broad muzzle and blunt nose with a gentle stop with a mid salmon leather, nicely outlined. He has cheetah lines on his face. Whisker break and straight line nose to chin, quite good chin and level bite. His body is muscular and firm, nicely muscled legs standing on neat paws. Slender tail with a blunt tip. Very nice coat that is short and fine with old ivory base colour and well defined sepia ticking. He has some barring to his inner front legs and short brown spurs on his hind legs.
