1 IGRCC HUTCHINSON'S GR CH MAKRISSNIC LORDOFOTHERINGS 16 M 20.8.11

Three and a half years old boy who was looking rather splendid today. Head has a round face when viewed from the front with full cheeks, impressive jowls and good breadth to skull and rounded top of head of good width between small to medium sized ears set far apart to follow the outer contours of the head, rounded at the tips. In profile rounded brow, medium nose break, nose just a trifle long but straight. Level bite but slightly shallow chin. Deep golden colour to large and well open eyes set wide apart. Huge, cobby, weighty body with a level back and broad, deep chest. Short, strong, well boned legs and large, rounded paws. Good, medium length tail is thicker at base and rounded at tip. Coat is fairly short with excellent density and fairly crisp texture, slightly softer on sides of body. British Blue of nice and even, pale to medium blue in colour, faint rings on tail. Lovely temperament.

### **USUAL SOMALI ADULT**

1 CC BOB FLETCHER'S SURFIN TYGER BRIGHT 63I F 23.3.13

Well grown just one year old girl who is still maturing. Lovely face shape when viewed from the front. Broad head, moderate wedge and gentle contours to brow, cheek and profile lines. A little more strength at cheeks would be nice. Bridge of nose to high forehead shows slight rise with good width between ears. Shallow indentation forms the rounded muzzle, I would prefer it slightly more generous for perfection. In profile shows slight nose break, then nose straight to tip, level bite but slightly shallow chin. Wide set to large ears, broad at base, pricked, well cupped and with good tufts and furnished inner edges. Eyes set obliquely and well apart, large almond shape, deep amber in colour. Elegant but deceptively weighty firm body with a level back, still maturing but well balanced. Slender, proportionate length legs and neat oval paws with light tufts. Longish tail, broad at base and gently tapering and with fullness to brush developing. Coat is developing density, close lying along back, starting to show some length and with a hint of ruff and breeches. Soft and fine in texture and in excellent condition. Usual Somali with nice black ticking showing bands of colour and with deep apricot base colour all the way to the roots. Black ear tips and tufts, pencil lines around eyes and on cheeks, top and tip of tail and well up heels. Apricot chest, belly, under tail, inner legs and breeches. Sweet natured.

Tall, large ears, wide at base, set high but well apart and tapering to appear pointed at tips with long tufts and feathering.
