

**JUDGE:** Mrs. Rosemary Fisher

**SHOW:** Abyssinian Cat Association

**DATE:** 12<sup>th</sup> April 2015

A very busy day, so I was grateful for the calm and able assistance of Caroline Turner-Russell. Thanks for your patience and help Caroline.

USUAL ABYSSINIAN KITTEN

**1<sup>st</sup> & BOB Lincoln's Linczozo Bee's Knee's F**

Very pretty 6½ month old girl. She has a moderate wedge with a gently rounded brow. Her ears are wide set, large and well cupped. Lovely rounded almond eye shape, colour presently hazel in tone, set well apart and lending a gentle expression to her face. In profile she has a slight nose break. Her muzzle is gently rounded and the line from nose tip to chin is straight; her chin is firm and her bite level. She has a medium sized body and, whilst not a large kitten, she is solid and firm. Slender legs and neat paws. Her tail balances her body shape, thick at the base and tapering to the tip. Her coat is short, fine and dense, perhaps a touch baby soft at present. Her colour and markings are excellent. Lines from the inner edge of her eye to the top of her head and from the outer edge of her ears. Her chin and lips tone well with her base colour. Her overall appearance is the desired rich golden brown, and her coat is distinctly ticked with at least four bands of colour. The base is rich apricot in tone and the ticking is black. Her underparts are bright apricot; dark heels and a dark spine line extends along her tail to a solid tip. Her legs are free of barring, there is an almost imperceptible faint broken necklet. Confident young lady, purring all the time, and very sweet to handle.

**2<sup>nd</sup> Miskelly's Glendavan Champagne Fever F**

This well grown girl is just a couple of weeks short of nine months and has classic good looks. Her head forms a moderate wedge with nicely rounded contours. Her ears are large, wide set, pricked and well cupped with small ear tufts. Her brow is nicely rounded. Her eyes are large, rounded almond in shape and well set. In profile she has a slight nose break, and a slightly rounded muzzle, a good firm chin and a level bite. She has an elegant neck and a medium sized firm body. Her legs are slender, well proportioned and she stands on small oval paws. Her tail is thick at the base and tapers. Her coat is short and fine, quite dense. Her overall appearance is a rich golden brown, her base hair is ruddy apricot and the ticking is black, there are four bands of ticking. Her chin and lips are cream. She has a line of ticking along her spine and tail ending in a solid black tip. There were several faint bars evident on the inside of her front legs down to her paws. Alert and friendly and shown in perfect physical condition.

## BLUE ABYSSINIAN KITTEN

**1<sup>st</sup> & BOB Kelsall's Khabasha Na'Adeshda F**

This girl is very nicely balanced, with a moderate wedge. Her ears are set wide apart and are well cupped and follow the line of her wedge. Her eyes are a rounded almond shape and clear amber in tone. She has a nice profile with a slight nose break and a gently rounded muzzle. The line from her nose tip to her firm chin is straight. Nicely arched neck leading to a firm well grown body that is medium in size. Her legs are slender and her paws small and oval. Her tail is thick at the base and tapers. Her coat is short and fine, the base colour is a warm pinkish mushroom, although there is lighter base colour to her flanks, it is still quite warm in tone. She has a nicely ticked coat, with four bands of deep blue ticking. The ticking extends along her back and tail and ends in a solid blue tip. She has cream to her lips and chin that extends a little way down her throat, her legs are beautifully clear of barring. Well presented and in excellent condition with a sweet temperament.

**2<sup>nd</sup> Lockwood's Khuphera Elexis F**

An 8½ month old girl with a good moderate wedge and wide based large ears that are well set and follow the line of her wedge. Her large, expressive eyes are a rounded almond shape and green in tone. She has a good profile with a slight nose break and a rounded muzzle, quite firm chin and a level bite. Her body is muscular and firm with a nice straight back. Her legs are elegant and proportionate and her paws small and oval. Tapering tail that is thick at the base. Her coat is short and close lying. She has cream to her lips and chin. Her overall appearance is a slightly cold shade of blue, the base colour is beige in tone rather than pinkish mushroom. Her flanks are ticked with dark blue grey, but her centre back lacks ticking and is rather solid. Well grown girl that handled nicely.
