A real cross patch. Good feel to body with good length balanced tail. Strong legs. Overall very nice head lines. Broad top of head with good size wide set wide at base ears. God nose line and firm level chin. Green eyes set with slight slant. Very good quality coat showing tortie pattern needs a little more distinction to tortie markings.

DEVON REX KITTEN

2nd. Macdonnell's LEXIFERS ENDEAVBOUR MORSE DRX n 03

A nice well grown kitten with overall good balance . Head muscular body with slender neck. good length tapered tail. Fine legs and oval paws. Strong head lines with large wide open low set ears. Almond shaped eyes. Has slight nose stop. Unfortunately is undershot at this stage, and lacks depth of chin. Coat still needs to develop full rippling, and rather harsh.

Sorry not to be able to award this kitten a first as the SOP does not allow it in a kitten when undershot, may be as he develops this will correct itself.
