Broad head, quite short in the wedge. Medium sized ears, no width to their bases, with rounded tips and showing a slight forward tilt. very slight rounding to top of head. nice sized chest. Coloured eyes, the top lines were slanted towards the nose and the lower lines were rounded. Good width to the cheek bones quite short nose showing a good break, straight to the nose tip, broad blunt muzzle. level bite, medium depth to the near level chin. The head balance was developing well. coat fairly short, fine in texture and close lying. The coat displayed a cool beige ground with and dusky dove grey markings, there was evidence of a slightly warmer brownish tone along side the dove markings to the face. The face displayed an M to the forehead, lines from eyes, pending to cheeks and spotted whisker pads. two necklaces to the chest. barring to legs and rings to the tail, the body displayed a butterfly over the shoulders and clear oysters to the flanks, the spine lines to the back were a little less clear at present. Spotted tummy, Give the benefit of doubt today or weather caramel should be added to this boy's description, interesting to see how he develops. lovely temperament;

ASIAN TABBY (SPOTTED, CLASSIC, MACKEREL OR TICKED,

KITTEN FEMALE.1st: WOODLEY'S KIMANI FIRE IN THE SKY

(ASH F23)(72.44e)(F) 6.2.16 A four month
 and three week old very pretty tortie
 mackerel tabby lass of a nice size and weight
 for her age. Straight back, rounded chest,
 slender legs with neat oval paws, the tail
 tapered to a rounded tip and balanced the
 body. Very nice broad short wedge to
 the heel. Medium sized ears, wide at their
 bases, with rounded tips and showing a slight
 forward tilt. Very slight rounding to top of head.
 Nice sized golden eyes of a good set showing
 the top lines starting towards the nose and
 the lower lines nicely rounded. Good width
 to the cheek bones. Short nose, good break
 straight to the tip. Broad blunt muzzle, level
 bite. Nice depth to the level chin. The
 heel showed good balance. I would have
 preferred the coat a little shorter, it was
 fine in texture and close lying. The coat
 displayed a warm toned coppery brown ground
 colour, black tabby markings and showing
 red tortie areas beginning to overlay the
 pattern. Nice pattern to the face including
 on M to forehead, reaching to cheeks and
 spotted whisker pads. Some barring to legs
 and rings to the tail. The coat displayed
 a nice mackerel tabby pattern. Hopefully
 as she matures she will lose a little
 of the slightly long luster coat. Worely
 temperament.
