

John H Hansson
Lancs CC. Saturday 11th March 2017.

My appreciation to Chris, Janet & committee for my invitation, as ever a really enjoyable show in spite of the ear bashing I received. I was fortunate to have a team of stewards in the form of Anna Choudrey & Jennifer Spence, both ladies were a pleasure to work with. I had a wonderful line up for BIS, my eventual winner was the British Blue kitten, who beat off really stiff competition from the Maine Coon/Oriental & Persian winners in particular. But that said she was seriously gorgeous & she will hopefully carry this forward. Not at all bad for a baby.

Part 2; Full Version,

Olympian Grand, Adult, Female; Two Females I have had before & placed in reversed order previously.

OLY WHITMORE'S IMP GR CH SUNSHIMMER VELA FLEUR LILIUM.

BEN n 24. 18-05-15. Brown Spotted Bengal, This girl was showing excellent maturity considering her youth. Rounded wedge, with high cheeks, good whisker pads, giving breadth, rounded brow, hint of break, firm chin & level bite. Her ears are set well & are a good medium size, round at the tips. Her eyes are large & well shaped being fuller rounded oval with dark liner enhancing the green colour. Wonderful body, it was long & beautifully firm well boned legs,, round paws, good size, moderately thick, to its medium length. Beautiful coat very soft & luxurious, possessing excellent density to its medium length. Dramatic well defined pattern, intricate elements over the shoulders, with horizontal elongated rosettes along her sides, well broken spine line, spotted tummy which she showed off to good effect, very well defined leg barring spots onto the lower legs & ankles, lovely facial striations, the facials are excellent, cheek ribbons, almost linking beneath her chin, to form a chin strap, complicated scarab on her brow. Colour has deep golden bronze colour, with rich warm apricot undercoat, beautiful contrast between pattern & ground with slight shimmer of glitter evident in parts, today she was a little more relaxed & as result showed a little better hence the reversal of placings., her condition was superb I understand she was later Best of Variety adult.

RES OLY OAKLEY'D OLYB IMP GR CH KREMLINKATZ KATYA KALIKOVA.

RUS a. 26-06-13. Russian Blue, looking as good as ever, head has a short wedge, from the eyes down, showing slight angle in profile, her muzzle has the required prominence, chin firm, level bite. Her ears are large & set tall, lightly furnished. She has a typical expression, gentle slant to the setting, lovely green to the colour, wide almond shape. Elegant body, long & lithe, good length of leg, oval paws, broad base to her tail of very good length. Coat has good evidence of double quality, quite a good density to the undercoat, with a pleasing soft top coat. Colour a softer mid blue tone, though I'd like more sheen ideally. Her condition was ad always excellent, black heels, excellent tail rings, solid tip. , her temperament, still with her usual grump which appears to be purely effectual. I do so like the look & expression of this girl she has such lovely poise too as she relaxes in her pen.

AOV SLH Grand Champion, Male;

John H Hansson
Lancs CC. Saturday 11th March 2017.

GR CH GREGSON'S CH JULESCOON AZLAN. MCO n 22. 09-06-15. Brown Classic Tabby Maine Coon, showing a wonderful degree of substance & maturity for his young age, very masculine head type & beautifully prepared. Head of overall excellence, marginally longer than wide, well defined cheeks, good squareness of muzzle, slightly heavy brow, shallow concave curve at the bridge of his nose, chin has good width & also depth, level bite. His ears are larger & he carries them tall, tufted tips, longer internal furnishings, His eyes were quite large could be more rounded detracted from slightly due to the heavier brow, fractionally deeper in set than slightly oblique, green colour. Beautifully developed body, broad chest, strong shoulders & flanks, rectangular appearance, heavily boned legs, large paws, tail I'd like a little longer ideally for his body proportions. His coat length was excellent, shorter over the shoulders, lengthening along his body, full breeches, shaggy tummy, good amount of ruff, well prepared. He has some brindling to the pattern along his lower back that aside his the pattern was otherwise very good facials, well defined leg barring, ,not tail rings as such. His ground colour was surprisingly warm for a Brown & the contrast well defined, black heels & outer edges of his paws. He was in wonderful condition & he was a gentle giant of cat. He looked extremely handsome.

RES GR CH Not Awarded. 2nd BURGESS'S CH KASSARO WASHINGTON. MCO n 03 22. 25-04-15. Brown Classic Tabby & White Maine Coon, I like this lads head type very much though at present he is a little out of kilter with his body having some catch up to do. Head is a little longer than wide, high well defined cheeks, good muzzle, in profile he has pleasing shallow concave curve at the bridge of his nose lovely perpendicular line to his deep chin, which was most impressive, bite level, he has quite a lot of gingivitis. (mentioned for information). The ears are large & beautifully set, being tall & alert, wide base with good furnishings, tufts their tips. Green eyes, slightly oblique setting, round & good larger size. His body has a great deal of filling out still to achieve, he is well grown & the bone is good but at present he is very narrow & lacks width across his shoulders & flanks & would benefit with more depth of chest, as result is little out of kilter, good legs & paws, very good length of tail which was impressive. Gorgeous coat is really was beautifully prepared, glossy top coat, typically shorter over the shoulders, slightly shaggy tummy, still to acquire fullness to his ruff. His white areas, chest, tummy, front paws & back legs were clean & bright & contrasted well against is rich warm brown Tabby markings, which were all well defined. He was splendid condition & has a lovely confident nature.

British Grand Premier, Male;

GR PR HOLDEN'S GR CH & PR CHRISHELL AL PURRCINO. BRI n 26-09-15. Black, its not easy to pull off being a Black cat, this boy manages it very well. Head well rounded apple shape, full cheeks, rounded brow, chin & bite good. His ears were relatively small & set well apart, fitting well into his head shape, neat appearance. Large eyes well open & round, deep orange colour, though the light did tend to drain a little. Cobby compact body, well proportioned limbs, round paws balanced tail. He has a lovely glossy jet black coat which was dense not perfectly sound but as black as one could hope for with intense sheen to the

John H Hansson
Lancs CC. Saturday 11th March 2017.

surface, could be a tad crisper ideally. He was a little shy than usual toady but still very amicable & in splendid condition.

AV Foreign Rex or Sphynx Grand Champion, Male;

GR CH WILSON'S CH STANREX NIDORAM SILMARILLION. DRX n. 28-05-15. Black Devon Rex, though I would prefer a little more masculinity. Short wedge, well defined high cheeks, good whisker break, just requires a little more muzzle strength ideally, flat brow between his ears, moderate stop, chin tapers fractionally, level bite. I would prefer the ears larger (not to imply small) & with more widely flared base, reasonably well set with good width between, tufted tips, muffs not really evident. Eyes are a pleasing wide oval shape, almost straight top line, good green colour (even if no points). Whilst not the largest of boys his body was lithe & firm with good weight for size, slender limbs, small neat paws, well balanced tail. coat was well waved & free of guard hairs & very soft as a result the waves though wide apart were well defined, & cover the majority of his body, legs & tail, just a little downier on the tummy area, slightly thinner are at the base of the tail, He was in lovely condition & he was such a gentle lad, who handled well & deserved his award.

Siamese/Balinese Imperial Grand Premier, Male;

GR PR & RES GR PR Not Awarded. 1st COOK'S GR PR STYPHERSON DREAMBOAT. SIA b 21. 01-08-14. Chocolate Tabby Point, Siamese, this lad is undoubtedly stylish but in my opinion still needs to fill out more fully before he is ready for an award at this level. He has a longer length wedge looking a little pinched, profile is virtually straight, good depth chin & his bite is level. Ears are set wide apart & have wide flare to the base, complementing his head lines, very good larger size. Gorgeous eyes, the shape & slant both excellent, deep blue colour & beautifully expressive, Long elegant neckline, his body is very long but still very lean & narrow, though he is well muscled I don't think he has yet attained the development required for an Imperial but that is only my own opinion, long slender legs, small oval paws, fine tail of very good length. Coat was beautifully close lying & well prepared, it was beautifully sleek. Clear coated in a light soft ivory tone, lovely facial markings, these are exceptionally sharp & clear for Chocolate, good scarab, well marked thumbprints on his ears, the leg marking are more subtle as one would expect of his colour but still evident, good tail rings. The chocolate colour slightly on the darker side with deeper chocolate to his heels & tail rings. He is lovely condition, & his temperament was splendid. I can't deny there is a great deal to like about the boy, but he still lacks the degree of maturity & masculinity for this level of award.

2nd RYAN'S GR PR RIDESTAR SEVERN SUNRISE. BAL d 21. 20-06-12 Red Tabby Point Balinese, this lad has become so heavy he was looking coarse & lacked elegance. Head was showing the degree of masculinity the other lad lacked, some muzzle pinch to his good length wedge, profile very good, firm chin, bite good. His ears are well set but need to be larger & require wider flare at the base to balance his head more fully. Eyes are oriental in shape if on the wide side, not as intense as the previous lad. Heavy rounded body which lacked elegance, slightly heavier boned legs & paws, tail was short to balance the body proportions & requires more fullness to his plume which is a little sparse. His coat length is overall good but his undercoat is a little woollier than ideal, as such

John H Hansson
Lancs CC. Saturday 11th March 2017.

the coat does not flow over the body as well as I would wish & the texture though soft could be silkier. Body is very heavily shaded, & his tracings I would ideally like to see more definition. He was in excellent condition & his temperament was very relaxed, sadly his excess weight has blurred his type completely.

**Siamese/Balinese Imperial Grand Premier, Female;
IMP GR PR Not Awarded. 1st GLAUBITZ'S GR PR LOLUJA DRESSED IN LACE.**

SIA m 21. 30-11-14. Caramel Tabby Point Siamese, Attractive miss, she has quite a short wedge, though this is balanced & relatively even wedge, small dip in profile, her chin lacks depth, her bite good. I would like her ears larger ideally, & they require more widely flared base though they were set well apart. Her eyes were a problem as they looked very small & deeper in set than I would wish & they were a little crusty at the rims, I called the DV who confirmed my findings which I discussed with her owner at the end of my judging, the colour appeared to be good from what could be ascertained. Not a big girl but surprisingly firm & weighty for her size, slim legs, fine tail, shorter length. Her coat was short & beautifully close lying, incredibly sleek, with soft sheen evident. Body is showing a degree of shading, though she still has very good contrast to her tracings, which are in the main very good, good facials, well defined leg bars, some linkage to her tail rings. These appear to be the more taupe tone indicating Caramel with deeper colour on the hocks, outer edges of her paws & tail tip, brownish tinge to the base of her ears & scarab to some degree. Eyes apart her condition was excellent & her temperament was charming.

British Dilute Tortie Adult;

1st CC & BOB. DRAPER'S CHRISHELL DOTTIE DRAPUR. BRI j. 06-06-16.

Lilac, for 9 months this girl looked wonderful & has gorgeous type. Really beautiful face apple round, impressive fullness to her round cheeks, round brow, good muzzle, firm chin, bite very borderline & sadly will I feel deteriorate but that is for another day. The ears are beautifully small & very neat, set well apart for her very young age, no distortion to her head shape. Eyes are well open & round, bright deep orange colour. Beautifully square compact body shape, low on her well boned legs, round paws, balanced medium length heavy tail. Her coat was beautifully dense, could perhaps be a little crisper, but perfectly in keeping with her very young age. Her colour is really beautiful she is a soft warm pinky lilac, intermingled throughout with generally softer shades of cream & is visually extremely attractive. Her condition was superb & her temperament was charm itself she was a delight, but her bite was extremely marginal & may well hinder her advancement.

2nd WOOD'S CHARNODLEYWOOD DIPPIN-DOTS. BRI g. 24-04-16. Blue, still a little tall & long, & head development not so well advanced as the winner but with super coat density. This girl is still a little unbalanced but not out of keeping with her young age, just to get it all together. Head still looking juvenile, to round more fully at the cheeks, good muzzle, rounded brow, good chin & level bite, Her ears still to widen a little more, though they are relatively small & do not look out of place. Eyes, round & well open, good colour bright orange. Body is proportionate to her age, still at the longer stage where she has to fill out, longer in the leg though well boned, round paws, balanced tail. Wonderful coat it was quite short, beautifully dense, with a very impressive degree of crispness

John H Hansson
Lancs CC. Saturday 11th March 2017.

for a girl of her age. Mid blue slightly tipped (not excessive), intermingled with varying shades of cream, evident throughout. Condition & temperament both excellent.

British Smoke Adult, Male;

1st CC & BOB. COLLINS'S SAORSA CHARMEDIMSURE. BRI ns. 13-07-15.

Black, I confess the certificate on this lad was extremely borderline as his bite is undeniably questionable, however as a Black Smoke of any breed he is the best I have ever seen, absolutely amazing. Very masculine looking lad with impressive stature. Broad rounded masculine head type, excellent fullness to his cheeks, tends to throw his whisker pads, rounded brow, broad nose, strong chin, cursory inspection of his bite indicates it was very questionable but I didn't want to push it too far & gave him the benefit of doubt. Broad skull, smaller medium size, ears, set well apart, & not interfering with his head shape. His eyes were open & round with an excellent intense vivid orange colour. Tick set compact body, deep chest, broad across his shoulders & flanks equally, strong well boned legs, good size round paws, balanced medium length tail. His coat was short & has excellent density & a good degree of crispness particularly for a Silver series. To all intents & purposes this lad appears to be a solid Black cat in the pen till he moves & his coat breaks to see his silver undercoat, which once parted is clearly visible throughout, even in the shortest areas, the contrast is sharply defined, with excellent glossy top coat, it really was quite superb & a true pleasure to see a genuine smoke with an even colour throughout, free of any pattern & not a blown silver. He was in super condition, but starting to tail swishing indicating it was time to go back into his pen. I stand by my comment that he is the Best Smoke I have ever come across.

Korat Adult, Female;

1st CC & BOB HAWKINS'S KOORAHK PRECIOUS. 19-02-15. Quite dainty petite girl who was incredibly vocal. Head has good heart shaped appearance viewed head on, her muzzle neither too pointed nor too blunt, flat forehead, slight stop & she has a slight rise on her nose, good chin, level bite. Her ears are moderately large with light internal furnishings, set high & alert. Her eyes are large & definitely prominent, her colour predominantly green with slight hint of amber, such an indignant expression. Her body was semi cobby though she is on the smaller side, that said all in proportions with good legs, small oval paws, her tail has slightly thicker base moderately fine shorter medium length. Single coat, fine texture, generally close lying, though opening along her spine line. Her colour is a mid blue tone, she has some silvery sheen which is more obvious in some areas than others. Her condition was excellent very vocal but it appears to be free of malice.

Also Considered for BOB. HAWKINS'S CH SAWATO KALASIN. 27-07-15.

Large lad who looks like he enjoys multiple dinners. His head requires more obvious heart shapes appearance head on, his muzzle was quite broad & longer than I would have preferred, good width across & between the eyes. Flat forehead, requires more obvious downward dip to his nose & he has no evidence of slight stop, chin good, bite level. His ears are moderately large set quite high on the larger side with sparse interior furnishings. His eyes are large & dominate his head, full round when alert, green colour. His body is very heavy with a

John H Hansson
Lancs CC. Saturday 11th March 2017.

somewhat expansive waistline (needs an elasticated waistband) very compact shape as result, his legs are relatively slender, oval paws, tail rather short & small tail irregularity at the extreme tip. Single coat,, reasonably fine texture. Mid blue colour with fair amount of silver tipping though I'd like it more obviously so. Quite an amicable chap, condition very good, though a diet would be beneficial.

Korat Kitten, Male;

1st DEACON'S KOORAHK GWILYM. 15-10-16. Very young & as yet all a little out of balance, has reasonable heart shaped face viewed head on but as yet is rather fine on the muzzle, with slight pinch, teething badly & has a slightly finer muzzle, small nose bump, slight stop, chin requires a little more depth, teething badly. Ears are set quite high, round on the tips, moderately large. Eyes could be a little larger to create more dominant effect, the colour has still to settle, being more hazel/light amber at present. Still very young, some growth to achieve, proportionate limbs, small paws, tail slightly short. Single coat which could be a fraction shorter, fine texture, opening at the ridge line. Mid blue, still to achieve more obvious silver tipping. Excellent condition, he was not happy about the experience.

Korat Kitten, Female;

1st & BOB WATON'S KOORAHK SIRIKIT. 15-10-16. What a little minx, taking trying to take Korat speak to the next level & she obviously now hates her brother in the next pen with a vengeance. very pleasing head though with heart shape in front view, flat forehead, slight stop, more evidence of downward curve than her sibling, her chin & bite good in spite of her teething. Ears are tall, sparse interior furnishing, quite large with rounded tips. Her eyes made a difference, possibly much to do with her irate state, but it definitely enhanced the effect, they were do dominate, round aperture, large in size, light hazel amber tone & obviously not yet settled. Body is quite dainty as yet, good legs & small neat paws, slightly thicker base to the tail which was quite fine, fairly balanced length. Single coat, though her ire raising her spine line, soft fine texture. Mid blue but showing more sheen than her litter mate. Condition was excellent, can't say the same for her lack of manners, one expects a vocal rendition from a Korat, but she was really pushing it & was making her indignation known, taking particular offence to her brother when she saw him, clearly not showing sisterly love.

Devon Rex Neuter, Male;

PC Not Awarded. 1st JONES'S AMUN MR FIZZIWIG. DRX ns 24. 23-05-15. Black Silver Spotted, His head though possessing width across the eyes was long in relation to its width, rather broad muzzle, lacking whisker break, flat brow, but no stop, just a very shallow break, his chin was good, bite very untidy. Ears have good wide base & larger size, if a little higher than I'd wish. Large eyes which are wide oval shape. His body hard & well muscled with deep broad chest, well proportioned limbs, oval paws, balanced tail. Sadly no coat to speak of, very thin further compounded by harsh guard hairs along his back & tail, broken whiskers & eye brows. He was a well mannered chap & his condition was excellent.

John H Hansson
Lancs CC. Saturday 11th March 2017.

2nd WEBSTER'S POOLSIDE PRINCE VELVET. DRX a 32. 25-07-14. TCR Blue, Shorter wedge, again lacks whisker break, fine on the muzzle, flat between his ears, minimal break, his chin requires more depth, bit good. The ears are set well but I'd prefer larger & more typically flared at their base, some muffs at their base. Eyes are large but much too round & almost bold which detracts making him look very startled. Good neck, body not as well muscled as the previous exhibit, slender limbs, small paws, tail relatively fine acceptable length. His coat was not as short as I would wish with a slightly shaggier appearance & more wispy wave in places, as opposed to rippled effect it was very soft & fine, but not typical, with the fur straighter on his tail, shorter whiskers, his coat lacks density

Devon Rex Neuter, Female;

1st PC & BOB. MURPHY'S GR CH KALTES RHAPSODY INBLUE. DRX as .
18-08-08. Blue Smoke, what a very attractive senior lady. Shea has a short wedge with high cheeks, showing good whisker break, good muzzle, flat on the brow between her ears, very good stop, short nose, chin & bite good. Her ears are set well & have well flared base, being critical I would prefer them larger. She has beautiful eyes being full oval eyes, wonderful mischievous expression, not so often seen now. Her body though not larger was well proportioned & firm, with slim legs & small neat paws, fine tail. With the exception of a slight amount of bareness towards the base of her tail she was otherwise well covered with a short reasonably dense coat which was soft & fine free of guard hairs, with soft rippled waves, some broken more stubbly whiskers. Wonderful temperament & condition, she was a delightful lady who actually looked the part.

2nd JONES'S AMUN PANDORAS BOX. DRX hs 21. 23-05-15. Chocolate Tortie Tabby, Litter sister to the boy in the previous class. Rather rangy girl who is quite dainty & fine, looking a little immature for her age. She has a reasonably short wedge, quite high cheeks, with some whisker break, though her muzzle is a little fine, flat brow, needs more stop, chin fair, bite good. Her ears are quite large & have good wide base but she is inclined to prick these rather high, small tufts, eyes too round & emboldened. & lacks the required expression as a result. Her coat though is short, it is soft & has a slightly wispier fluffier texture with as a result a lack of density to the wave, albeit she was well covered, free of guard hairs,, stubbly whiskers. Charming temperament, very good condition.

Also Considered for BOB. TANTON'S PR NIDORAN SILVER DOLLAR. DRX as 21 08-02-15. Blue Silver Tabby, very well muscled body, broad chest, well proportioned legs & paws, his tail was quite a well balanced length. His head is rather long in the muzzle which detracts as he does not have a typical Devon look, requires higher cheeks line, & his whisker break is shallow break, strong chin, bite good. His ears are quite large but carried a little high & require more flare to their base,. His eyes are large full oval shape, (green colour if anyone is interested, as there are no points). His coat is very uneven, with some wave, the texture is harsh & more wiry in texture lacking density with lots of harsher guard hairs, stubbly whiskers & eyebrows. His condition was excellent with a confident temperament.

Tonkinese Neuter,

Considered & Awarded BOB. DEACON'S PR TONKINNI LEMON DELIGHT. TOS b 32. 12-03-15. Chocolate, well balanced girl well worthy of a CC (or even

John H Hansson
Lancs CC. Saturday 11th March 2017.

a PC.....oops!) fitting nicely between the two original parent breeds. Head shows a moderate medium wedge, showing gentle whisker pinch, very slight break in the profile, reasonable chin, bite level. Ears are medium size, oval tips & are taller than wide, with a slightly angular setting. Her eyes have a full almond shape, bluish green colour, gentle slant. Body was firm & well toned, with good length, slender limbs, small neat paws, slight taper to the medium length tail. Quality coat, which was close & short, silky fine texture. Colour was reasonably warm showing more contrast than I would ideally prefer but she is a light coloured chocolate & still very young, so may well take much longer to reduce the level of contrast. Her condition & temperament both splendid.

Chocolate Point Siamese Adult, Male;

1st CC & BOB. GURNEY TAYLOR'S TINKERTAYLOR D'ARTAGNON. 22-04-16.

Very young & with more development to come, but where one would expect given his age. Good length virtually even wedge, very good profile, good depth chin, scissor bite. Ears are large with good flared base, he can on occasion prick them a little higher, though this improves as he relaxes. His eyes are marginally deeper in set, oriental shape, the blue has a good depth of colour. Body has very good length, just to muscle up more fully but not out of keeping with his age, long legs & oval paws, good length tail. His coat marginally long, (nothing excessive), laying close & sleek. Clear ivory coat, which afforded excellent contrast, his point whilst not yet fully complete were developing well, typically paler stockings as is usually the case with Chocolates, his mask still to colour fully, whilst not milk chocolate he did have warmth. He was in splendid condition & has a very composed gentle nature.

Tabby Point Siamese Adult;

Considered for & Awarded BOB WALKERS'S GR CH COSITA DARCEY

BUSSELL. SIA a 21. 01-02-14. Blue, not a big girl but overall pleasing. Not a long wedge but with balanced even lines, small dip in profile, her chin requires a little more depth, bite good. The ears I'd prefer a little larger with more flare to their base but nevertheless, are very set with excellent width between. Beautiful eyes, deep vivid blue colour, well defined shape & slant. She is a little on the plumper side with quite fine boned legs & small neat paws, her tail is fine looking a little short possibly attributable to her slightly fuller figure. Her coat was short & close, very good sleekness to the texture.. Body is shady, though reasonably tonal, & still some contrast to her tracings, good facials, excellent leg bracelets, offset tail rings, darker blue heels & tail tip. Excellent condition, very placid temperament.

Red Point Siamese Adult, Female;

1st CC & BOB. CASSAR SIMMONDS'S DEBIKAT NEMESIS. 28-04-16. Very much the young adolescent, though a nicely balanced & very even girl. She has a balanced even wedge, profile almost straight, reasonable chin, level bite. Ears are large, set well apart but not exaggerated, flared complementary base. The eyes are typically oriental in both shape & slant, with a very good depth of blue & such a lovely gentle expression. Good neckline, body is firm & development in keeping with her age, slender limbs, small paws, fine tail. Well prepared short close lying coat, with satin like texture. Body clear near white colour, her points

John H Hansson
Lancs CC. Saturday 11th March 2017.

are a definite red, though I would like them deeper ideally. Beautiful condition & charming temperament. Exactly where one would expect her to be given her young age.

Red Point Siamese Kitten;

1st & BOB. BROCK'S KEVELS PRINCE HARRY. 19-10-16. Very pleasing little chap,. There is nothing quite like a well balanced exhibit which conforms to the SOP's as they tend to do well as they are unlikely cause offence regardless of who the judge is. Balance wedge, with even lines barring minimal kitten pinch, very good profile, chin has fair depth, bite good. Ears are large, set well apart, good width to their base which complements his wedge. Eyes are a very typical oriental shape & slant, with a very good depth of blue to the colour. Body is firm & well proportioned for his young age, with slender limbs neat paws, good length fine tail. His coat is close lying, with a well prepared finish, good shorter length. Milky white body colour with excellent contrast to his points albeit these could be a little more intense ideally. Very pleasing little chap, without any undue exaggeration, excellent condition & temperament.

Tabby Point Siamese Neuter;

1st & PC THORPE'S SHERMESE JOIE-DE-VIVRE. SIA n 21. 06-04-16. Seal, delightful young miss, she is a stylish girl & has much to admire. Beautifully balanced even triangular wedge, virtually straight profile, chin is good enhanced by her small beard (a thing of the past, but I still like to see it), level bite. Beautifully set ears, excellent larger size & wide flare at their base, which harmonises with her wedge enhancing the even lines & equilateral effect. Gorgeous eyes, really beautiful shape & slant & possessing a very good depth of blue, wonderful expression. Good neckline, lithe toned body development proportionate to her age, good length, slender limbs, small paws, good length fine tail. Her coat was close lying, good length, very satin like finish & well prepared. Body of warm beige, her tracings are really beautiful, striped cheeks, 'M' to the brow, thumbprints on the ears, excellent leg barring, well defined tail rings, dark seal brown heels, Her condition was super & her temperament was charming, she was looking much more relaxed out of her pen, very elegant.

2nd WROE'S GR CH COSITA SUSHI LATANYA. SIA a 21. 22-09-14. Blue, another very attractive girl obviously more mature head type, which made the choice between the two difficult, I would willingly have awarded this girl a certificate. Head is shorter but even & almost straight profile, chin could be deeper, bite good. Her ears are set well apart, I'd like a little larger but she is a much more girl & they are proportionate to her development, set well apart. Again lovely eyes., vivid blue, excellent shape & slant, lovely expression. She is v elegant & firm, with slim legs & small oval paws, fine tail could be a little longer. She has a beautiful coat, it is short & very close lying, beautifully prepared sleek satin like finish with soft sheen. Some tonal shading in blue, with generally quite good definition to her Blue Tabby tracings, though contrast could be a little better, good facials & leg bars, solid blue heels. She was in super condition & has a very genteel demeanour. The younger girl has a little more style which determined the ultimate placings.

Considered for & Awarded BOB. COOK'S GR PR STYPHERSON DREAMBOAT. SIA b 21.

AC Persian Breeders Neuter;

1st STEWART'S GR PR BARLEYFIELDS PADDINGTON BEAR. PER d.

12-08-14. Red, handsome cat, sadly the area he was in did nothing for his colour making it appear, dark & flat. Masculine head type, broad & round with well filled cheeks, broad round skull, good stop, short nose, well formed nose leather & nostrils, strong chin with good width, bite virtually level. Ears are set wide apart & low, smaller size. Eyes well rounded & open, deep vivid orange colour. Strong neck, strong body, deep chest, low on his strong boned legs, large paws, balanced short full bushy tail. He has a full coat with very good density, full frill, soft fine texture. Sadly his location in the hall was not advantageous for his colour, though it was as clear as one could possibly hope for in a red, it was also coloured to the roots, it appeared very flat whereas a little further along the lighting was much improved. His condition was excellent, very relaxed composed chap.

AC Persian Neuter Not bred by Exhibitor; Not an easy choice.

1st BOYES'S GR CH & OLYB IMP GR PR VIVALDI TEDDY-BOYES. PER d 03.

17-09-13. Red Bi-Colour, Gorgeous eye colour, beautiful preparation, well developed body, rich red. Clean white.. I have handled this lad on a number of occasions & think he is a wonderfully well balanced representative of his breed. Head is broad with well rounded cheeks, broad top, excellent stop, short nose, well formed nose leather & nostrils, good deep chin, minimally undershot bite, Ears are small & well placed, with a neat tidy appearance & well furnished interiors. Beautiful eyes the colour is stunning deep vibrant coppery orange, well open shape & pleasing boldness, Cobby, well muscled body, excellent bone to his legs, round paws, short bushy tail. Lovely preparation to his coat it has excellent soft fine texture, full frill, stands away for the body, well groomed, soft fine texture. His white was clean & sharply contrasted by his deep bright red colour, which was also sound. Super condition & excellent temperament, later Best Persian Exhibit.

2nd SMITH'S ALGERNON PICCOLO PER a 03. 24-05-15. Blue Bi-Colour, I liked this lad very much. Large well rounded head shape, with fullness to his cheeks, broad round skull, excellent stop, good nose leather, broad deep chin, bite a little undershot. His ears are set well apart & low on his broad top, longer internal furnishings. He has lovely eye shape, larger well open round shape creating a pleasing degree of boldness, colour could be a little deeper, being a golden light orange tone. Chunky solid body, cobby shape, low on his strong legs, round paws, bushy tail. Well groomed coat, of overall excellent length & fullness, with a lively quality standing well away from the body. Clean white contrasted by the cooler blue, need to tidy up the odd white hairs on the blue patch over his back. Splendid condition & such a confident nature.

AC British Senior Adult; 3 really handsome exhibits, I'd have been happy with any to win a class.

1st DALTON-HOBBS'S IMP GR CH LORASTON BILLY-IDOL. BRI e 03.

20-07-13. This chap has a really lovely face, apple round well filled cheeks, rounded brow, well developed muzzle, firm chin, level bite. His ears are set well apart, smaller size, lovely neat appearance. His eyes are round & well open,

John H Hansson

Lancs CC. Saturday 11th March 2017.

intense coppery orange colour. Thick neck, cobby compact body shape, strong legs & round paws, heavy tail of medium length. Coat was beautifully dense could be just a tad crisper ideally. Body has excellent cobby shape, strong legs & large paws, balanced medium length heavy tail. Excellent demarcation. Between his cream & white, with clean whiter lines between the two, if you want to breed BiO Colour of any breed you have to realise there is potentially extra work involved in keeping the coloured areas sharp & clear of odd white hairs as in this case, so many congratulations, the white is clean & bright, the cream though still with a vestige of pattern to fully clear, it is soft & as sound. As you could hope for in a subtle cream of this tone. Wonderfully composed temperament for an entire male, superb condition.

2nd BUJALSKA-AXON'S CH DELPHINIUM SIMPLY RED. BRI d 24. 20-12-13.

Red Spotted, extremely handsome & superb muscular exhibit. Masculine head,, very broad, cheeks are well developed though to some degree masked by his heavy jowls, rounded brow, strong chin, bite level. Broad skull creating excellent width between his medium size ears, just a little open at the base, his eyes are a beautiful deep coppery orange, well open & round good larger size. Thick muscular neck, deep chest, huge frame compact & deep chested, strong flanks, heavily boned legs & huge paws, heavy tail. Dense coat. It has a good degree of crispness, ideally it could be marginally shorter but nobody gets everything & this lad has so much more. His body pattern is well spotted there is a little linkage but nothing untoward, his colour is an intense bright red,. Superb temperament & wonderful condition.

3rd WOOD'S GR CH APATCHICAT HAYMICKABENATHY. BRI d.

AC British Kitten;

1st BEARDSMITH'S MEWSOS EARTHA KITT. BRI a. 07-07-16. Blue, wow! wow! just beautiful amazing coat. Later my Overall Winner for Best in Show. My boxes were well & truly ticked.

Type - Tick,

Condition - Tick

Temperament - Tick

Where to start, Beautiful head, apple round, cheeks already well developed & round, round brow, strong chin, level bite. Her ears are small & set well apart, fitting her head shape to nigh perfection. Her eyes are round & open, very good deep intense orange colour, wonderful expression. Body is beautifully cobby & compact low on her strong legs, round paws, very well balanced tail. Her coat was absolutely amazing, so beautifully short & incredibly dense for such a baby, it was so crisp you could almost leave finger print impressions in it, you only wanted to scrunch it. Soft toned blue with the most minimal tipping & otherwise a sound even tone throughout. Her temperament was fantastic & her condition, super, she really was true delight & the best British coat I had all day. Well deserving her Overall Best in Show, loved it.

2nd BEARDSMITH'S MEWSOS ETTAJAMES. BRI a. 07-07-16. Blue, litter sister to the winner & again very lovely in her own right, actually she is also prettier but not the same degree of impact. She has an extremely pretty face & looked so girly & smiley. Round head, good muzzle, her cheeks are well developed, round brow, chin & bite good. Her ears are small & well placed fitting well into her head contours well. Eyes well open & round, bright orange. Body like her sister

John H Hansson
Lancs CC. Saturday 11th March 2017.

cobby shape & low on her strong legs, round paws, good tail. Coat is a good shorter length, but lacks the crispness of her sibling being softer & not quite as dense but under most circumstances would have done very nicely for a girl her age. It was also more heavily ticked with a paler banding of colour beneath. Wonderful temperament & again her condition was superb. Another lovely kitten in her own right.

3rd CABELL'S ABLUKI ELEANORE RGBBY BRI ny

Russian/Abyssinian/Cornish Rex/Devon Rex or Korat Adult;

1st OAKLEY'S OLYB IMP GR CH KREMLINKATZ KATYA KALIKOVA. RUS a.

2nd WILSON'S CH STANREX NIDORAM SILMARILLION. DRX n.

3rd STARK'S IMP GR PR DUSHENKA ORPHIEL. RUS a,

AV Foreign Limit Neuter;

1st WILLIAMS'S TYPHAST FIREKRACKA. BEN n 22. 30-05-16. Brown Spotted Bengal, handsome youngster developing well, lovely colour & pattern, ears still to widen off a little more. Still very much the young adolescent & some developmental issues to address, but some of these are nothing more than time factors. Head still to broaden & round more fully, I'd like to see a little more prominence to his whisker pads, gentle hint of break at the eye line, good chin, level bite, wide set canines, his ears still to widen off a little more, medium size & rounded on the tips. Eyes are large, rounded oval shape hint of slant, strong neck, long body muscling up well, strong well boned legs & round paws, medium thickness to his tail which is marginally long. Lovely coat, very soft medium length. Well defined facial markings leg barring & tail rings, very good spotted pattern showing some rosetting, smaller spots over the shoulders. His colour was rich & bright, well contrasted, spotted tummy, paler muzzle area extending on the throat. He was in lovely condition & his temperament very amicable.

2nd JONES'S AMUN PANDORAS BOX. DRX hs 21.

Russian/Abyssinian/Cornish Rex/Devon Rex or Korat Adult; Little to choose between 1st & 2nd the reason became clear when I saw the catalogue as they were brother & sister.

1st MCGLASAHN'S IMP GR PR SHOELINA MARIAVA OLEG. RUS a 04-06-12
Russian Blue, handsome, short wedge, from the eyes down, good muzzle prominence, slight angle in profile, showing gentle concave curve at the eye line, good depth chin & bite. His ears set tall, pointed effect to their tips, light internal furnishing, moderately large. Eyes a definite green, fuller almond shape, in a gentle slanted setting. Body is well proportioned, good length, slender limbs, small neat paws, broader base to his good length tail.. His undercoat could possibly be a little more evident but still with double qualities, soft fine top coat. Quite a soft blue colour, with good evidence of translucent tipping present. Very composed relaxed temperament, super condition.

2nd MCGLASHAN'S GR PR SHOELINA DIAMOND JUBILEE. RUS a. 04-06-12.
Russian Blue, little sister to the class winner. Virtually ditto but in a more feminine version the only real difference was the chin, depth. Short wedge, muzzle again prominent whisker pad, hint of angle in profile, reasonable chin, bite level. Ears of good size, set tall, lightly furnished interiors. Almond shaped green eyes, pleasing expression. Good neckline, long elegant body proportions,

John H Hansson

Lancs CC. Saturday 11th March 2017.

long legs, oval paws, tail thicker base & well balanced length. Double coat, soft & fine to the top. Even mid blue colour, with a good amount of silvery sheen evident particularly the shorter areas. Condition was excellent & temperament was charming.

3rd PINCHES & TWIGGER'S PR RUGBUG LUKE THIGHWALKER. CRX bs.

AC Oriental Non-Self Adult;

1st DEVLIN'S GR CH BAROUSHKA BY-DESIGN, OSH ns 03 25. 22-07-15.

Black Silver Ticked Tabby Bi-Colour, striking exhibit but he is something of a cringe & as such does himself no justice. His white areas are sparkling white. Beautifully strong head with even lines to his wedge of good length, strong profile just a small rise on the nose, chin has very slight taper, level bite, His ears are large, complementary wide flared to their base, beautifully set & excellent top line. He has beautiful eyes, the right enhanced by the black eye liner, vivid green colour. He has a wonderful body, its long & strong, with slender long limbs, oval paws, fine tail of well balanced length. Beautiful coat short & extremely close lying, satiny sleek, so beautifully prepared. Sparkling clean white, with varied size mainly smaller patches of Silver Ticked Tabby evident, small muzzle splash of tabby with a slight amount of tarnish, present, Wonderful condition & superb temperament. He is in wonderful condition just a little lacking in confidence to make the best of what he has to offer, he is a very handsome lad.

2nd BROWNRIGG'S HEMLOCK SMOOTH OPERATOR. OSH n 24. 15-05-15.

Brown Spotted, very young & lots of growing & maturing to achieve, This lad has an excellent head, showing balanced lines to his even wedge, excellent profile, I'd prefer a little more depth of chin, bite level. Very large ears which are beautifully flared at the base & complement the strong wedge, the setting is excellent low but not too much so. His eyes fill the eye socket & are a very pleasing oriental shape & slant, wonderful vivid green, he has a very gentle expression. Body is very long & lithe & though firm & well muscled he has still to fill out & develop more but at not yet 10 months has time on his side for this, long slender limbs & oval paws, long fine tail, impressive length. Beautifully sleek coat, incredibly sleek & a very good shorter length.. He has well spotted body pattern, spine line breaking well, beautifully defined facial tracings, leg barring tail rings also very good.. There is some agouti invasion to the spotting blurring the edges in part but not excessive & this does not unduly detract from the overall clarity. The only real criticism was that to the overall colour was cold lacking the required coppery ground. Beautifully composed youngster in superlative condition.

AC Oriental Self Kitten;

1st TONKINSON'S TENAJ MYSTICMEMORY. OSH c. 13-10-16. Lilac, balanced young chap no undue flash, but with a pleasing balanced appearance overall. He has a good length wedge with small pinch as yet, no doubt due to teething with very swollen gums, very good profile, chin good, as was his bite. Ears are large set well, could be a little wider at their base. The eyes are a pleasing shape & slant, also showing a very good definite green colour already. Body is proportionate to his age, developing length, slim legs, small paws, tail quite fine & well balanced length. Coat could be a little shorter, laying close & has an

John H Hansson
Lancs CC. Saturday 11th March 2017.

excellent texture. The colour is a little on the dark side requiring a little more pinky warmth, at present banded & unsound but his is hopefully just a transitional phase. He was in excellent condition & has a very gentle nature.

AC Oriental Non-Self Kitten;

1st KEOGHAN'S ORIEAMORE ZLATA. OSH f 25. 26-08-16. Brown Tortie Ticked Tabby, most attractive miss, of overall excellent type. She has a good length wedge, very balanced overall, profile developing well, chin was good, level bite. The ears were large & very set with excellent width between, good wide open base which complements her head lines. Eyes enhance by the black rims, oriental shape & slant, beautiful vivid green colour. Her body is lithe & elegant, with slim legs, tiny paws fine whip like tail. Her coat was a reasonable shorter length but she does fluff it on occasion, though otherwise close. She has an amazing amount of Red present, most unusual fro Tabby of any pattern without white let alone Ticked, the brown elements were rather dark & cold, but the red made up for it, the ticking was in the main well banded, only time will tell if this extends itself equally to the red areas as she develops. Condition was splendid, very gentle nature.

Wrong Coloured HINSON'S ANNAMAR CHANTILLY LACE. OSH m 24 (n) 23-06-16. Entered as Caramel but actually Brown , Almost adult & small as yet, so will need a growth spurt. She has lovely type & is very stylish, excellent head lines, profile virtually straight, chin I'd like deeper, level bite. Very large ears with wide well flared base, very well set, good top line with gutters. Her eyes are a very good oriental shape & slant, lovely green colour, pleasing expression. Body is lithe & long but need to fill out & grow on more fully, slender limbs, small paws, fine tail which has a very small irregularity at its tip. Coat short & close, satin like finish. Good spotted pattern & well defined tracings to the extremities, all contrasted well even if somewhat cold, black heels, outer edges of her paws & tail tip. Definitely 100% brown & not Caramel, not even a questionable one. Her condition & temperament both excellent.

AC Oriental Non-Self Kitten;

1st EDWARD'S SUP UK OLYB IMP GR PR HEMLOCK ALFREDO FERRARI. OSH b 24. 05-01-14. Chocolate Spotted Tabby, Lovely head lines the length is excellent showing complementary even lines, very good profile, firm chin & level bite. His ears are really beautifully set & I would say just about perfect, being not too low nor too high, wide well flared base, excellent larger size. Stunning eyes the shape & slant being exquisitely oriental combined with a really beautiful y bright green colour, with the most gorgeous expression, what more could you ask for? Long, long body, beautifully toned, long slender limbs, oval paws balanced of by an wonderful long fine tail. Beautifully prepared short, very close coat with sating like finish. His pattern whilst not perfect, is nonetheless impressive, well broken spine lines, well spotted along the length of his body, well defined facials & extremities. He has an attractive warmth to his ground colour the chocolate pattern could show a little more warmth.. Wonderful condition Y super temperament. I would say the breeder has pretty much sewn up Oriental Spotted Tabbies at present & congratulate her on her achievements,. This lad is wonderful & makes my day I love his eyes.

John H Hansson

Lancs CC. Saturday 11th March 2017.

2nd ALLEN'S GR PR ALDERSTAR MID-KNIGHT SKY. OSH f. 01-01-14. Black Tortie, generally good head type, some pinch to the muzzle, very slight dip in profile, chin could be deeper, missing most of her incisors. Her ears are moderately large, set well though just require a little more flare to their base. Her eyes are on the larger side & look a little too bold, the colour though is an vivid green tone. Body has good length with slender limbs, small neat paws, quite a fine tail. Her coat is slightly on the longer side & not laying as sleek as I would have wished, fluffing it open & the texture could be sleeker as a result. She is a good combination of Black & shades of red. Condition was sound, very amicable lady.

Wrong Classed THORPE'S JOHPAS DELEALLI. OSH d 03 33 (SIA d)
13-05-16. Entered as Red Bi-Coloured appears to be a straight Red Point Siamese. At present this lad is somewhat out of kilter, which was exacerbated by his panic when removed from the pen. He is at present looking a little unbalanced & does himself no justice. He has a medium wedge, showing some muzzle pinch, profile not quite straight, I'd like more depth of chin, bite good. The ears are good size & set well, wider flare to the base would benefit. He widens his eyes & he has such a worried expression, good depth of blue, Body is as yet still very typically adolescent & a little rangy, slim legs, small paws, he was bushing out his tail. Coat is a little longer than I'd prefer, slightly dryer texture which he exacerbated by fluffing it out. Clear body, milky white, his red points could be more intense but there was no evidence of white to be seen, hence I wrong classed as this was a class for Orientals. His condition was sound, just extremely panicky out of the pen & trying to cling onto it, for dear life.

Siamese Breeders Adult;

1st HELM'S GR CH VELEVETENA FAWNTOCAPTIVATE. SIA p 19-08-10.
Fawn Point, beautiful size & development, mature & well balanced, She has a shorter wedge, not quite straight profile, chin okay, good bite. Ears though I would like larger & to have more flare to their base, they were set well apart. Her eyes fill the socket & are a lovely depth of blue for such a subtle dilute, very striking, though I have no doubt enhance by temper. Her body is beautifully firm, good length, long slender limbs, well balanced tail. The coat was beautifully prepared & very sleek, good shorter length. Her body has a clear slightly off-white tone, with good contrast to her soft new mushroom points colour, which was soft & quite subtle just deepening slightly on her mask & ears, with very delicate hint of colour on her stockings. Her condition was excellent, can't say the same for her temperament as her manners require refinement.

2nd GURNEY TAYLOR'S TINKERTAYLOR D'ARTAGNON. SIA b

3rd WALKERS'S GR CH COSITA DARCEY BUSSELL. SIA a 21.

Siamese not Bred by the Exhibitor:

1st PALMER'S CH TINTALLY MOONLIGHT. SIA c. 17-10-15. Lilac Point, I really like this girl she is so beautifully even & balanced, stylish. She has a well balanced even triangular wedge, tiny break in profile which does not unduly detract, chin good, level bite. Ears are set well apart & balance her head lines, with good wide base, good size. Her eyes are lovely, the shape & set both excellent having pleasing oriental slant, deep vivid blue colour, with such a trusting expression. Firm girl of good body development, slender limbs, neat

John H Hansson
Lancs CC. Saturday 11th March 2017.

paws, well balanced tail. Her coat was a good shorter length, beautifully close lying & well prepared, sleek satin like texture. Clear light magnolia colour, very good contrast to her points, which are a slightly cooler tone of lilac requiring a little more pink to warm the colour. Her temperament was splendid & her condition superb. whilst not being overtly flashy, she is most pleasing.

AC Siamese Maiden Kitten;

1st RAHTBONE'S BELLIS SUMMERTIME. SIA B 21. 18-08-16. 18-08-16.

Chocolate Tabby Point, very spindly kitten who I would like a little better grown for her age. Her head ideally requires more width in relation to its length rather pinched wedge & muzzle is rather sharp, developing profile, chin tapers a little, bite good. Ears are quite large would benefit with a little more flare to their base & she could hold these lower in set. The eye colour has good depth of blue, slightly wide, worried expression. Body is as yet very spidery which she exacerbated by fluffing her coat which made it appear overlong & a not as close as I would wish. Body is clear ivory, well marked Tabby tracings. Condition was sound, temperament very good.

AC Siamese Radius Kitten;

1st ENTWISTLE'S GABLEME ARUBA AMARYLLIS. SIA m 21. 24-07-16.

Caramel Tabby Point, as yet she has rather a pinched wedge, developing profile, needs a stronger chin, bite okay. Her ears are set well with good flare to their base, good larger size. The eyes are very full as opposed to true oriental, creating a rather startled expression, not the deepest blue but not infer pale. Her body I would like to show a little more development as she is now over 7 months, slim legs oval paws, balanced length tail. Coat laying close, could be a little shorter, well prepared. Her tracings are more blue than Caramel, evidenced by the nose leather & heels, but still very young so may become more obvious as she grows. Some body shading developing. Condition & temperament both excellent.

End of Report.
