

## Kentish Cat Society – 21/10/17

Mrs Di Brown

Many thanks to Helen Sean & Sue for the judging invitation, a well attended show and a huge amount of effort had gone into the Halloween theme which it made it that extra bit special. I was fortunate to have my very good friend Barbie James to steward, she is always good company and is extremely good with the cats.

### **A.V. Imperial Grand Premier Neuter Female**

**Oly – Denny’s IGR PR GARIBALDI’S QUE SERA (IMP) (BSH a) FN 08/10/15.** A super British lady neuter, excellent type, strong and cobby overall. Round head with broad skull and dear little round tipped ears set wide and fitting the contours of the head. Full fat cheeks and well rounded muzzle, gentle curve to forehead, short broad nose with blue nose leather, deep chin lines up with the nose tip and the bite is level. Gorgeous eyes, round open and expressive with vibrant orange colour. Short strong neck, substantial and cobby body, with deep chest and low hindquarters, short strong legs and round paws, tail with rounded tip to balance. True British blue colouring, clear of ghosting and almost sound, coat really short and very dense, just a touch soft in texture today. She was not very impressed with us but handed okay, presented in excellent condition.

**R - Power’s GR CH & IGR PR INDIANSTAR SUMARA (BUR c) FN 13/03/11.** This lilac Burmese lady neuter has such a lovely wicked look to her. Super short wedge with a very good blunt finish at the muzzle and excellent depth of head. Rounded broad top with medium size ears that are broad at the base and rounded at the tip, set to follow the upper part of the face and with a slightly forward tilt in profile. Gently rounded forehead with distinct nose break, short straight nose, deep chin lines up with the nose tip and the bite is level. Naughty expression to eyes, large and lustrous, top line slanting to the nose with a rounded underline and set well apart, colour chartreuse. Not the largest of ladies but she is very weighty for her size and her body is well muscled with chest rounded in profile, slender legs and neat paws, tail of medium thickness to balance. Paler dove grey colouring with a hint of pink but also has a very slight fawn-ish overtone in places today, changing coat perhaps? colour darker on the extremities with light shading to the body and clear coated, with a paler tummy. Gorgeous texture to coat, particularly for a female neuter, short and close with glossy satin-like feel to it. Excellent temperament and presentation.

**3<sup>rd</sup> – Patey’s IGR PR SILVERSMOKE ELLY MAY (ABY o) FN 22/04/10.** A good size girl of lovely type and rich colouring. Moderate wedge which tapers nicely to a rounded muzzle that shows a very slight indentation, very good width to the top of head and a gently rounded brow, ears large pricked, set well apart and to follow the lines of the wedge. Profile shows slight nose break, chin is firm and the bite is level. Large expressive rounded almond eyes, set well apart, paler hazel in colour. Weighty body of medium length with rounded rib cage, tummy line a little rotund, proportionate slender legs and neat oval paws, tail tapers well and balances the body length. Gorgeous colouring, a lustrous copper ticked with chocolate and with bright apricot undercoat, minimal dorsal line, chocolate tracings to the face and over the top of the head with darker tips to the ears, no barring to the limbs, tail with solid tip. Coat length and texture excellent, short fine and dense, lying close to the body. Super to handle and excellently presented

**4<sup>th</sup> – Power’s CH & IGR PR INDIANSTAR SHIMILA (BUR c) FN 10/09/14.** The same stable as my Reserve, also a very nice lady with some very good qualities. Short wedge with blunt finish to the muzzle, rounded top with good breadth between medium sized round tipped ears which are set to follow the upper part of the face, gently rounded brow with good depth of head, distinct nose break with a fairly short straight nose, firm chin lines up and the bite is level. Large lustrous eyes, with good width between, perhaps a touch round but expression better once she relaxed, yellowish in colour. Medium sized body with a strong rounded chest and a well muscled feel to it, slender legs and neat oval paws, tail of medium thickness that tapers to a rounded tip and balances the body length. Dove grey colouring, clear coated and with the merest hint of pink, a little darker on the head ears and tail, also over the back the latter shading gradually to a paler tummy. Short fine coat, lying close to body, glossy and satin-like in texture. Excellent temperament and presentation.

**5<sup>th</sup> – Campbell’s IGR PR SHANTAI KOJI (SIA w) FN 30/11/10.** A mature lady neuter of very good overall type and balance. Medium length wedge with good width to the top of head, ears of very good size, nicely open at the base and set to follow the lines of the wedge. Profile almost straight with firm chin and level bite. Oriental eye shape and set, colour very good for depth but to nit-pick could be more brilliant in tone. Elegant neck line and a long elegant body, the latter excellent for tone with a lovely trim tummy line for a female neuter of this age, long slender legs and neat oval paws, tapered tail needs an inch to balance. Pristine white coat very well prepared throughout and with excellent sleek close texture. A little shy but handed well. Excellently presented.

**Not placed: Theakston’s IGR PR TROIKA OKSANA (RUS a) FN 12/07/14.** A very nice lady for type and she has lovely bright green eyes, but she was lightweight and somewhat out of condition, lacking muscle over the spine, her coat was rather long, showing a very distinct ghost dorsal line, and the texture was not quite right today. Sweet tempered and easy to handle.

#### **A.C. Oriental Grand Premier Male**

**IMP – Russell’s GR PR KAMIK THEACEOFSPADES (OSH n) MN 02/07/16.** An ultra stylish male neuter, not the largest of boys but all in proportion and he is nice and weighty for his size. Strong medium length wedge with excellent broad top line and huge bat like wide at the base ears, set very well but held marginally low at times. Snooty expression to eyes, well shaped and set, colour a rather murky tone but some green seen. Strong profile, deep chin and level bite. Long well muscled and firm toned body that is surprisingly substantial, long elegant legs and neat paws, whippy tail to balance. Super coat, jet glossy black, short sleek and very close-lying, sound to roots. A showy neuter boy who handled very well, excellently presented.

**R – Jones’ GR PR SOULSTEALER KAMALI (OSH d 03) MN 20/10/15.** Another very nice neuter lad, he has very good type and is a really good size. Longer wedge with good width to the top of head, ears large nicely flared and set to follow. Profile good, chin lines up and the bite is level. Eyes oriental in shape and set but held wide with apprehension, colour a very good bright green. Long weighty but elegant body, long legs and tail to balance. Attractive balance between red and white, red patches show some light pattern – ticked based by the look of it, white patches pristine and plentiful, in all the correct places and well over the one third required. Coat length and texture excellent, very sleek and close lying. He is a very handsome person but needs some self belief to let it shine through. Gentle natured and excellently presented.

#### **A.C. Siamese/Balinese Grand Champion Female**

**GD – Collins’ CH ALEXSIAM HAUTE-COUTURE (SIA n) F 05/07/15.** A dainty and stylish lady of lovely type. Super head with broad top line and very large flared ears set wide. Straight strong profile, firm chin, bite untidy but level-ish. Expressive eyes, oriental in shape and set with mid blue colour. Well defined neck and a long very svelte but weighty body, long dainty limbs and neat spoon paws, tail long and whippy to balance. Warm seal points with a touch of brindling to the tail and under the eyes today, creamy tones to body particularly the bib and tummy with some medium tonal shading to the back, thus good contrast. Coat length and texture very good, short close and sleek. Not very happy, she appeared to be somewhat outraged but the attentions of the amorous bloke next door, but handled well nevertheless. Excellently presented

### **Cream Kitten**

**2<sup>nd</sup>, 1<sup>st</sup> & BOB w/h – Hawke’s ZENITH PHOEBE (PER f) F 29/04/17.** A very nice kitten for type and well grown. Round head with fullness to the cheeks and muzzle, broad top of head, ears small, rounded at the tips and set low with long paler internal furnishings. Would like a little more rounding to the forehead and the skull is marginally bumpy at present, deep stop and a short snub nose with full pink nose leather and open nostrils, deep chin, bite just a touch under which is fine but unfortunately it is also twisted, confirmed by the duty vet. Large round eyes with orange colour. Excellent weight and substance to body, short legs with very good bone and large round well tufted paws, short well furnished brush tail. Excellent coat colour, a pale pastel cream with minimal ghosting and almost sound, coat medium in length with frill to face and shoulders, soft and fine in texture and very well prepared throughout. Shame about her bite – in every other way she was worthy of the 1st & BOB. Excellent temperament and presentation.

### **A.C Tabby/Smoke/Cameo & White Kitten**

**1<sup>st</sup> & BOB – Parks’ LADYGEM CONSUMING-LOVE (PER n 03 23) F 06/07/17.** A dear little babe, promising for type. Round head with good width between her neat round tipped ears that have amazingly long pale furnishings and are set well apart, nice full cheeks and muzzle. Rounded forehead with deep stop, short snub nose with good full nose leather and open nostrils, deep chin and almost level bite, skull still a little bumpy at present. Super eyes, round and lustrous, colour still developing. Chunky little body, really weighty for her size, good strong bone to her short legs, paws large round and tufted, dinky fully plumed brush tail. Indeterminate brown tabby pattern with pristine white to face bib tummy and paws. Soft fine baby coat with wispy guard hairs as yet. Just about the right size for my pocket and I would have happily taken her home. Excellent temperament and presentation.

### **A.C. Exotic SH Self Kitten**

**1<sup>st</sup> & BOB – Daniels’ OWLETTTS KENZO (EXO n) M 28/02/17.** Very good type to this older baby, not the largest of kittens for 8 months but all in proportion and with good weight for size. Well rounded head with good full cheeks and muzzle, broad smooth skull, he still needs to grow in to his ears but they are set well apart. Good stop with a short snub nose of even width, nose leather a little reduced but nostrils fairly open, deep chin and almost level bite. Large round eyes, excellent for expression and rich orange in colour. Medium length weighty body, very good bone to short legs, tail to balance. Jet black coat sound to the roots, medium in length, undercoat could be a touch denser but still has a lovely plush texture and stands away from the body fairly well. The sweetest nature, excellently presented.

### **Golden Tipped Adult**

**CC & BOB - Terziliski's KINSEY GOLDEN INTRIGA (BSH ny 12) F 01/12/16.** This lady was entered in my Ticked Tabby class in error and I initially wrong patterned her as she is clearly a Golden Tipped. Fortunately this was changed before the slip went up on the board and as there were no other Golden present I was able to judge her as what she is. A very nice lady with good size and substance for a youngster. Well rounded head though typically out of kilter with the body size at the moment, has good breadth to the skull with fairly small ears set well apart. Rounded forehead with a short neat nose, chin good and bite level, cheeks full and muzzle nicely rounded. Round eyes open in expression and bright green colour. Good weight and substance to a slightly rangy adolescent body, short strong legs and tail with rounded tip to balance. Body delicately tipped with black tipping throughout with paler apricot undercoat, coat short and has a hint of crispness to it, it could be a little denser but should improve as the year goes on. An attractive adolescent who handled well, excellently presented.

### **Chocolate Kitten**

**1<sup>st</sup> & BOB – Tolhurst's ADJULBR CINDY MINFY (BSH b) F 01/05/17.** A well grown and chunky baby for 5 months. Well rounded head with good breadth to the skull, needs to grow in to her ears but they are well set. Good full cheeks and rounded muzzle, short nose, firm chin and level bite. Large round eyes, open and expressive with rich orange colour. Compact and cobby body with short thick legs and large round paws, tail with rounded tip to balance. Rich chocolate colouring, there was a little ghosting to the sides, but this should go as she grows, and it was impressively sound for this colour. Baby coat at the moment, reasonably short and dense but very soft in texture. A sweet babe, excellently presented.

### **Smoke Kitten**

**W/C – Greenaway's TIGATAILS CHERRY BAKEWELL (BSH ns) F 19/05/17.** A very nice kitten for type and well grown, but unfortunately she is a standard Black rather than a Smoke as entered in my book. There is considerable paling down the hair shaft on the body, but this is simply unsoundness, as there is no evidence of silver elsewhere in the places you would expect to find it, on the face, under the chin, base of the ears and under the tail. Head type is good with small ears set well apart and to follow the contours of the head, rounded forehead, with a short nose, chin firm and bite level. Large round eyes with mid orange colour. Chunky body with good short legs, neat round paws and tail to balance. Coat jet glossy black but with the aforementioned unsoundness, a little long and soft in texture. A change of coat - and registration should hopefully remedy things. A friendly kitten excellently presented.

### **Tipped Kitten**

**1<sup>st</sup> & BOB – Terliziski's JULTER RAFFAELLO (BSH ns 12) M 23/04/17.** An attractive young male kitten with very nice head type, has lovely full cheeks for a baby and good breadth to the skull, with small round tipped ears set well apart, rounded forehead, short fat nose with brick red nose leather, good chin and bite, muzzle well rounded. Round eyes, open in expression, colour still developing but a good green coming through. Body rather long and lanky at the moment, needs to fill out but is a good weight for his size, medium length legs reasonably well boned, medium length tail with rounded tip. Coat is a little long but is quite crisp in texture, with even medium tipping overall. Handled well and was excellently presented.

### **Golden Tipped Kitten**

**1<sup>st</sup> & BOB – Wilkinson's ABALUKI DANMOSO DEVIATION (BSH ny 12) F 22/03/17.** A nice big girl for 6 months and good for type. Rounded head with good width between small round tipped ears that are set well apart, gentle curve to forehead with a short broad nose, chin lines up and the bite is level. Lovely eyes for shape and openness of expression with bright

green colour. Short strong neck, body really weighty and fairly compact with good depth to chest and low hind quarters, short strong legs and medium length tail to balance. Excellent pattern, even black tipping to body and the apricot undercoat is a lovely rich tone giving her an attractive golden glow. Coat short and fairly dense with a hint of crispness to it. Sweet tempered and easy to handle. Excellently presented.

### **A.C. Bicolour Kitten**

**1<sup>st</sup> & BOB – Pointer’s DACHCOMBE NOTHING TO LOSE (BSH a 33) M 08/04/17.** A beautifully grown kitten, a really chunky and cobby boy. Round head with good width between medium size ears, good fat cheeks, tends to puff out his whisker pads and square off his muzzle at times, rounded forehead, nose perhaps a touch long, firm chin lines up and his bite is level. Open and innocent expression to his large round eyes of clear blue. Large cobby body with excellent bone to his short legs, enormous round paws – he is going to be a very big lad by the look of it, medium length tail with rounded tip. Mid blue points, pale body colour with light tonal shading, Coat short and dense with a hint of crispness. Such a friendly boy, has the sweetest nature. Excellently presented.

**2<sup>nd</sup> – Tolhurst’s ADJULBR WHITE GOLD (BSH e 33) M 01/05/17.** This very nice kitten has the better head type of the two, but overall is not quite as well developed in relation to age as the winner, although he is weighty for his size, and his points colour is not good for a cream, which thus put him down to second today. Round head with broad skull, full cheeks and well rounded muzzle, ears fairly small and set well apart, short fat nose, firm chin and level bite, teething pinch to muzzle. Round eyes, opens them well, clear blue in colour. Medium length body with plenty of substance, short legs and round paws, tail to balance. Cream points colour very hot indeed – almost appeared to be red other than they have a “matte” rather than bright finish, body almost white and unshaded, coat baby long and soft in texture at the moment. Excellent to handle and excellently presented.

### **Foreign White Neuter Male**

**BOB – Campbell’s IGR PR SHANTAI SAMURAI BOY (SIA w) MN 30/11/10.** A stylish and elegant boy of very good type. Well balanced head, medium in length with broad top line, ears large and nicely flared, set in line with the wedge. Slight dip to profile, firm chin and level bite. Oriental eye shape and set, colour has good depth but lacks a little brilliance of tone. Elegant neck, long weighty and firm toned body with super trim tummy line, long slender limbs and neat spoon paws, tapered tail to balance. Pristine white coat, beautifully prepared, short sleek and very close lying. Easy to handle, a very relaxed boy, immaculately prepared and presented.

**Also considered: Campbell’s IGR PR SHANTAI KOJI (SIA w) FN 30/11/10**

### **Oriental Black Neuter**

**BOB - Russell’s GR PR KAMIK THEACEOFSPADES (OSH n) MN 02/07/16**

**END OF REPORT**
