

Thank you, Doreen and Claire and the committees, for the invitation to judge again at these shows. I had a very enjoyable day with some lovely cats to judge. Thank you also for the very welcome hot lunch and my judges' gift at the end of the day. Thank you too, to my husband who very ably stewarded for me.

#### **MAINE COON SILVER TABBY SERIES KITTEN**

1<sup>ST</sup> BOB MILLIGAB'S DUX NOBIS IL GUARDIANO (MCO ns 22) M 20.06.2018

An adolescent silver classic tabby male of just under 8 months of age. Happier in the pen than out today. Head is medium in length with balance in lengths from ear to nasal bridge and tip of nose. Firm chin and level bite. Has a perpendicular nose to chin line and shallow concave curve at the nasal bridge, very very slight bump to end of nose, which is of uniform width. Good square muzzle. Large tall ears feathered and well tufted, with width at base and tapering to appear pointed. Lovely full and round greeny yellow coloured eyes, with slight oblique set, and spaced well apart. Long rectangular body with good boning and substance. Strong boning to legs with large round tufted paws. Long flowing tail that balances the length of his body, breeches and ruff developing. Semi long glossy topcoat over the undercoat. Very clear tabby markings on head and face, good butterfly marking over the shoulders and very stripy legs. Just a hint of tarnishing on the nose and face. Beautifully prepared. Lovely to handle.

#### **MAINE COON RED TABBY SERIES KITTEN**

1<sup>ST</sup> BOB MULLEN'S PEPPERMAINE REBEKAH (MCO f 03 22) F 01.06.2018

A tortie classic tabby and white female of just 8 months of age. Has a medium head, a little more length would be nice for perfection, but it was balanced. Well placed large tall ears with good width to base and set well apart. Ears feathered and tufted at the tips. Good square muzzle with perpendicular nose to chin line. Nose is of uniform width and concave curve at the nasal bridge but has a slight bump which detracts slightly from her look. Level bite and fairly firm chin. Lovely yellowy green full, round eyes set slightly obliquely and well apart. Rectangular body of a good size weight and bone for her age, sturdy legs with tabby bars, large round paws with tufts and a long flowing tail. Coat developing well with frontal ruff and breeches, well prepared showing tabby markings with a good distribution of black and shades of red, snowy white paws, chin and chest. Good temperament and condition.

2<sup>nd</sup> MILLIGAN'S WESTLAKES RANEISHER (MCO f 023 22) F 06.08.2018

A tortie classic tabby and white female of just 6 months of age. Head needs more width to balance the length at this time. Well placed large tall ears with good width to base and set an ear width apart. Ears feathered and tufted at the tips. Muzzle needs a little more width, just looks a little bit pinched at the moment, perpendicular nose to chin line. Nose is of uniform width with concave curve at the nasal bridge but has a slight bump to the end of the nose. Level bite and ok chin. Lovely golden yellow full, round eyes set slightly obliquely and well apart. Rectangular body of a good size weight and bone for her age, substantial legs with large round tufted paws and a lovely long flowing tail. Coat developing, still a little kittenish, but has frontal ruff and breeches with shaggy white tummy fur, good glossy top coat. Clear tabby markings on head and oysters developing on flanks.

---

Very well prepared, pristine white legs, paws and chest and lovely temperament. Just not quite as balanced on the day as my 1<sup>st</sup> placed kitten.

### **AOC MAINE COON KITTEN**

1<sup>st</sup> BOB KOKINA'S W'ALMAZ AMERKUN (MCO n) M 06.06.2018

A substantial glossy black young male of just over 8 months of age. Well balanced head, medium in length with balance in length between ear to nasal bridge and tip of nose. Width is slightly less than the length. Square muzzle, firm chin with perpendicular nose to chin line, level bite and nose of even width. Profile has shallow concave curve at the nasal bridge. He has large tall ears set high and well apart with super tufted tips tapering to appear pointed and well feathered, good width to their base, had to feel as very difficult to see through the black colouration. Pale yellow/green full rounded eyes well-spaced apart with a very slight oblique set. Lovely substantial large muscular body, long with proportional limbs giving a rectangular shape. Breadth to chest developing, neck moderately long. Very substantial legs with large round tufted paws of a size to balance. Long tail reaching the length of his body, wide at the base and tapering to the tip with profuse and flowing fur. Lovely glossy top coat developing over the undercoat with a ruff to frame the head, breeches present. Very sound black. Very well prepared with friendly temperament and one to watch.

2<sup>nd</sup> HALL'S ARMAN PRIDE YANIS (MCO e) M 04.09.2018

A cream male of just over 5 months of age. Medium head which is a little short and not balancing width at the moment. Square muzzle developing, reasonably ok chin, nearly perpendicular nose to chin line, level bite, nose of even width. Profile has shallow curve at nasal bridge. Large ears not quite set high enough, wide at base and tapering to tip, well feathered and tufted, set reasonably well apart. Orange eyes that are round but could be fuller for perfection and slightly larger to balance head. Good substance to body for his age, long with legs in proportion to give rectangular shape. Good boning to legs and large rounded tufted paws. Long tail to balance length of body, wide at the base and tapering to the tip, long profuse flowing tail fur developing. Kitten coat still, but can see it developing, frontal ruff just appearing. Lovely temperament and well prepared.
