

Red Cream & Tortoiseshell Society 30/11/2019

Wayne Vessey

Many thanks to Stuart and Barbara for their kind invitation to the RCT and Chinchilla, Silver Tabby and Smoke joint Championship show. Such a well organised and friendly day with some fine cats presented. My steward for the day was Shelley Jenkins who handled the cats with skill and kindness, many thanks again Shelley

Grand - AC Self British Champion Male Adult – 3 quality males presented

GC BROWN & BROWN'S GrCh KOLINGA PINK CADILLAC (BSH c, M, 17/06/2018)

Although clearly still adolescent, as he should be, this male shows absolutely correct development for his age. He impresses with his defined British type, very correct proportions and pronounced muscle tone. The head is markedly masculine, apple shaped and with well positioned ears of medium size showing rounded tips. The forehead shows breadth and a gentle curve, the nose is short, broad and straight. Normal chin development. For me his breed typical open expression, not only in terms of attitude but also with the absolute correct position, size and shape of the deeply pigmented copper eyes put this male a step above the competition. He has broad shoulders, a compact body and wide rump, correct chest and deep flanks, balanced thick tail. Straight powerful boning to the limbs and firm, rounded paws. The coat is thick, dense and plush, well textured and in perfect health. There is a frosty tone to his pigmentation with clear pink indication and total soundness to same. His perfect show condition was married to a relaxed and attentive demeanor, quite the showman. A top class example of a lilac British and a pleasure to subsequently select him as Best Adult.

RGC DALTON-HOBBS' Ch LORASTON REDDY TEDDY GO (BSH d, M, 08/08/2018)

Another very good young male with the adolescent frame his age would suggest. He has a round skull with well positioned medium sized ears and good development of the cheeks. His muzzle is developing but shows rounded lines. The forehead is curved and the nose is short and broad, chin to become firmer. His expression is open and confident. The eyes are round, a good size and well placed, they are a lighter, but even shade of gold. He has a compact solid body with very good muscle tone breadth across the beam. He has a well developed chest and strongly boned limbs with firm paws. Balanced tail. His coat is short and crisp but needing to be that bit denser as he gets back into full coat. There is a rich vibrancy to his red pigmentation, which shows a few ghost markings but nothing out of the ordinary. He was flawlessly presented. This is a male with excellent composure and presence who just needs maturity and natural development for those finishing touches.

Blue British Adult Female

CC & BOB MISKOVIC & MISKOVIC'S CHUPAVI JINX OF LUKE (BSH a, F, 11/05/2017)

This is a female of a good medium size and weight, with commensurate muscle tone, weight and boning. Her head shows normal development from the front, with a good position of the medium sized ears. There is a slight pinch at her muzzle but she was rather tense. Her eyes are a mid golden shade, round and well placed, showing just a hint of stress on the day. Her profile shows a heavier brow, the nose break shouldn't be any more pronounced. Short nose, chin recedes. This girl is at the darker end of the blue range, with fading to the roots and some silvering. She is not in full coat at the moment but it is short with good texture. The tail is slightly short and thin. A little bit anxious but settled to show a sweet nature.

Blue,Lilac or Fawn Tortoiseshell White Adult Female

CC & BOB DALTON-HOBBS' Ch STONEMARR STEVIE NICKS (BSH g 03, F, 01/09/2018)

This is a well grown, strong and substantial female with pronounced body development and muscle tone for her age. She has a round head, with good cheeks and muzzle, well placed medium sized ears. The expression is open and her golden eyes are well positioned, a good size and round. She has a broad chest and beam, well proportioned limbs and firm paws. The thick tail has a rounded tip and balances well to the body. Good proportion of white to patches, the mid blue and cream patches showing a slight paling to the roots. Her coat is of standard length and has a praiseworthy texture, scrunchy, thick and crisp. This girl was very well presented and impressed with her charm, very good British type and overall balance.

Lilac British Kitten Female

1 & BOB DALTON-HOBBS' LORASTON LULU-LOUBOUTIN (BSH c, F, 28/06/2019)

A kitten is of a good size and weight with very good type and proportions. She has an essentially round head with chubby cheeks and well placed ears which she needs to grow into. Marginal age related muzzle pinch presently. Her eyes are a muddy golden tone, round and well placed. Her expression is open, confident and typical. She has a very good profile where the chin could be a little bit firmer. She has a compact body and very good boning to the limbs, her paws are round and firm. The tail is thick and balances well to her body. Her coat has a kitten softness is thick, dense and plush. She is a cooler, but even toned shade of lilac with a high level of soundness. Presented in very good condition and with a delightful temperament.

Blue, Lilac or Fawn Tortoiseshell &White British Kitten Female

2 ACTON'S IDLEBECK FLORAL DANCE (BSH g 03, F, 30/07/2019)

I was struck by the lovely type and balance of this baby, who is well grown, already compact and solid. She has a round head with chubby cheeks, she needs to grow into her ears which are a tad broad based. Her expression is open, confident and typical. The eyes are developing a pleasing golden tone and are round and well placed. Very good body proportions, strong limbs and firm paws, balanced tail. Her coat is short, dense and thick, with a good texture for her age. Not quite enough white for me today, she has patches of a darker blue, and paler cream against a bright white. This girl was shown in perfect condition and conducted herself with great charm.

AC British Longhair Neuter Assessment(except silver series) Male

M & BOB FISHER'S XZIBIT HAIRY BIKER (BLH e, MN, 26/08/2016)

I have had the pleasure of assessing this male many times and I have to confirm my previous assertions that he is a BLH of the absolute highest caliber. In terms of Structure, type and masculinity he ticks all the boxes, the cream is totally sound and his coat shows an absolutely resilient texture. His presentation was flawless, and his show attitude as sparkling as ever. A credit to the breed.
