What a lovely large balanced mature lass, she had a broad rounded head with slight dip in profile, full round cheeks tapering to a strong well developed muzzle, she had a firm chin, and I have to say for 11yrs 4mths she had all her own teeth. Her ears were medium in size well spaced of good shape, her eyes were almost round of a mid blue colour which was of good depth for her age, She had a wonderful gentle expression. Her Large body was of very good muscle tone and balanced beautifully with her head. She had thick set medium length limbs which ended in short strong paws. Her tail was bushy and proportionate with the body. Her white gloves were scalloped being slightly higher to the outside but symmetrical and below the stopper at back. Her socks were white and even, and her gauntlets were two thirds with blunt finish and symmetrical. Overall she was in full coat with full ruff and slight curls on her stomach, She had a wonderful silky feel and texture to her coat. And she was beautifully groomed. Overall her points were of an even dark brown and her body was of a clear pale beige with a beautiful slightly golden hue. This girl was a pleasure to handle and she also had lovely whiskers a credit to her owner.
