

SCOTTISH REX CC SHOW. 1st August 2015.

Report by Mrs Dorothy A Stone.

Well, what can I say?! What a precious gem of a show. Every Rex owner/lover should come at least once in their lives, it is that special. Mere words cannot express my gratitude to **Kate, George & the Committee** for the invitation to come up & judge my favourite Breeds at this super little show on my 60th birthday. What better way to celebrate thought I, than to spend the day cuddling the curly ones in company with my favourite people – well, all except for my beloved husband Colin who sadly had to work, that is. Thanks also for finding me my super steward **Lesley Coyne** who was a delight to work with in every way. Thanks for taking me on **Lesley** & I hope you will work with me again sometime.

The standard generally was very high, the atmosphere in the hall so warm & friendly which quite made up for the dismal weather outside, the lunch was delectable & the Bad Brownies lived up to their name! The hospitality was very comfortable & kind of you but the cards, presents & wonderful cake were quite overwhelming! I thank you all from the bottom of my heart, but most especially **Bee Watson** for my favourite Coffee & Walnut cake, also **Bee, Dougie & Molly Stewart** for taking me to visit Hill House, Helensborough the following day, all of which made for an unforgettable weekend & the best birthday ever. Thank you one & all.

AV CORNISH or DEVON Female Grand Champion. 2 present.

Imp Linton-Sinclair's Gd Ch SIARUNG SYNERGY. DRX fs 24. 2 yrs, 4 mths.

Short broad high cheek boned wedge set on an elegant muscular neck has a fairly strong muzzle with well defined whisker break, wavy whiskers & eyebrows. Profile shows flat skull at forehead & between ears, fair stop, firm level chin & level bite. Large wide based well shaped ears are fairly low set but had no muffs or tufts. Large lustrous hazel eyes are well shaped set & have that naughty Devon expression. Mature queen of acceptable size has firm muscular body of good weight, nice broad chest, stands tall on sturdy muscular legs, neat oval paws, tail of good shape & length is well covered & rexed. Short soft fine coat that could be a little denser covers her body, limbs & undersides completely and is very well rexed in close waves. Shown in top condition, this super lady was happier in her pen today. Many congratulations on her BOV & Best Devon Exhibit win.

Res McFadyen's Gd Ch DEVILICIOUS CROMARTY GIZMO. DRX n 21. 21 months.

An elegant muscular necks supports a fairly short broad high cheek boned wedge that is a little too fine in the muzzle & lacks a whisker break, short stubby whiskers adorn her whisker pads & her eyebrows are the same. Profile shows flat skull to forehead & between ears, fair stop to slightly long nose, chin is very weak & receding but bite is level. Lovely large wide based, ears with tufted tips are quite low set. Lovely large yellowish-green eyes with that naughty Devon expression are oval in shape & spaced well apart. Younger queen of good size has the desired slim muscular body of good weight; good breadth to chest, stands tall on slim muscular legs, neat oval paws, well covered & rexed tail is of good shape & length. Really super coat to this lass which covers her completely being short, fine, dense with lovely

soft feel & is very well rexed in close waves. Shown in top condition, this shy retiring violet to whom I awarded a Gd Ch not so long ago failed to show to her best advantage today.

AV CORNISH, DEVON or LaPERM Grand Premier MN. 2 present.

Imp LOVELL's Gd Pr CLOUDBORN BARB DWYER. LPL b 25. 2 yrs, 2 mths.

A medium length muscular neck supports a high cheek boned modified wedge longer than its width but whose contours could be more rounded & muzzle broader. Profile shows required flat plane at forehead, gentle break to broad nose, deep level chin & level bite. Lovely large well shaped & set ears have tufted tips & super long curling muffs around the bases. Just love this boy's expressive gold eyes that are very well sized, shaped & set. Now fully grown & in his prime this large handsome chap could lose a pound or two for purrfection but his solid body is firm & muscular with proportionate limbs, tapering slightly short tail is furnished more like a bottle brush than a plume. What a fabulous coat this darling boy has! Absolutely copybook being of medium length, crinkled, stands away from the body, is springy & is so light that it parts at a breath! Shown in splendid condition this worthy winner was happier in his pen today. Many congratulations to all his connections but especially to his doting owners.

Res McWilliams's Gd Ch & Gd Pr TAMORIE FANDABIDOZY FREDDY. DRX ns 24. 9 yrs, 1 mth.

Short broad high cheek boned wedge set on an elegant muscular neck has a strong muzzle, well defined whisker break, wavy whiskers & eyebrows. Profile shows flat skull to forehead & between ears, good stop to short nose, firm level chin & level bite. Low set ears are well shaped, have tufted tips & are of good size. Lovely hazel eyes have that naughty Devon expression. Mature gentleman of good size has slender muscular body of good weight, broad chest, proportionate limbs, well shaped tail of good length is well covered & rexed. Short fine dense soft feeling coat that is well rexed covers body & limbs but has very fine down on his underside. Shown in top condition he was scared stiff & despite our best efforts, failed to show to his best advantage. Little to choose between him & winner.

AC DEVON REX PREMIER FN. 1 present.

1st RITCHIE's Pr NOBILERO DORCASMAGYAR, DRX ns. 6 yrs, 11 mths.

Sorry, Gd PC not awarded.

Short broad wedge set on a long muscular neck has a fairly strong muzzle, well defined whisker break, very short wavy whiskers & eyebrows. Profile shows rounding to brow, flat skull at forehead & between ears, very good stop to short nose, but whilst her bite is level, her chin is exceedingly weak & receding. Gorgeous low set wide based ears with proper "jug handles" are of very good size & shape with lovely muffs around the bases. Oval eyes that could be a little larger lack the slightly acute slant to the upper eyelids & thus the characteristic naughty expression. Mature lady of good size has a slender muscular body of good weight; nice breadth to chest, stands tall on slim muscular legs, tapering tail of good length is only very sparsely covered with soft hair. Unfortunately she seems to have completely dropped her coat at some point earlier this year hence whilst the little she has around her head & neck is soft, dense & has some rexing, elsewhere however, it is

excessively short over a big area and is composed of a large percentage of guard hairs giving an undesirable harsh texture. So sorry to disappoint but since this is a withholding fault, I was unable to award her the Grand on this occasion. She has super type so please try her again after her coat has re-grown.

CORNISH REX UNTITLED FN. 1 judged.

1st CC & BoB PUNTON's PIXIEPURR GLORIAGAZOR. CRX g. 16 mths.

Immature head type as yet – moderate high cheek boned wedge set on an elegant neck is a little fine in the muzzle still, whisker pads bear medium length crinkled whiskers & her eyebrows are similar. Profile shows a slight dip, her bite is level & her chin tho' level is very shallow. Well shaped & set ears could be rather larger. Lovely eyes of medium size are oval in shape, the top line of the upper lids being almost straight giving that typical heavy lidded sultry look. Elegant young queen of good size has slender muscular body of medium length & good weight, stands tall on slender muscular legs, has small oval paws, fine tapering tail that is well covered & rexed needs an inch or two for perfection. Lovely short dense coat with silky feel is very well rexed in close waves. Shown in top condition I loved this sweet amorous hussy who I'm sure will do very well.

DEVON REX BREED CLASS.

BoB awarded to Michelle Linton-Sinclair's gorgeous lady **Gd Ch SIARUNG SYNERGY** to whom I had awarded the Imperial.

DEVON REX UNTITLED MALE ADULT. 1 present.

1st & CC Dr BROWN's CHEREK BOOGYWOOGY BUGLEBOY. DRX n 03. 2 yrs, 7 mths.

Short broad jowly wedge set on a long muscular neck has a strong muzzle & well defined whisker break, whiskers & eyebrows are short & stubby. Profile shows a flat skull at forehead & between ears & a very good stop, bite is level but I'd like a stronger chin. Huge ears with tufted tips are low set & very well shaped. Pale yellow-chartreuse eyes are well shaped set & have that uniquely naughty expression. Now in his prime he has a lovely slender muscular body of very good size & weight, good breadth to chest, stands tall on sturdy muscular legs, neat oval paws, tail of good shape & length is well covered & rexed. Lovely short, fine dense coat covers body, limbs & underside completely, it is rather straight down his spine where it is shorter, but down his sides, shoulders, flanks & legs it is very well rexed in close waves. Shown in top condition, I loved this gentle chap.

DEVON REX UNTITLED FEMALE ADULT. 4 present (+ 3 for BoB only).

1st & CC Linton-Sinclair's SIARUNG IZZY AZALEA. DRX fs 21 2 yrs, 4 mths.

An elegant muscular neck supports her short broad high cheek boned wedge that has a strong muzzle with well defined whisker break, wavy whiskers & eyebrows. Profile shows flat skull at forehead & between ears, strong stop, firm level chin & level bite. Large wide based ears of desired shape & when relaxed in her pen, were quite low set. Gorgeous pale blue eyes are well sized, shaped, set & have the naughtiest Devon expression I've ever seen! Mature queen just a little smaller than I'd like has a firm muscular body of good weight, nice broad chest, stands tall on sturdy muscular legs, neat oval paws, tail of good shape is well covered & rexed but needs an inch or two for perfection. Short soft fine coat that could be a little denser covers her body, limbs & undersides completely and has really excellent rexing in close deep waves. Shown in splendid condition, this shy, sweet lady ran her stable mate very closely indeed for BoB but lost a point or two on her tail length.

2nd Dr BROWN's PIXIEPURR HULA HOOP. DRX ns. 2 yrs, 4 mths.

Broad wedge set on a muscular neck could be slightly shorter, muzzle is quite strong & whisker break well defined, whiskers & eyebrows are short & wavy. Profile shows flat skull at forehead & between ears, fairly strong stop to slightly long nose, chin has depth but recedes, level bite. Large wide based ears with tufted tips are of good shape & are quite low set. Expressive pale green eyes are well sized, shaped & set. Mature queen of good size has a firm muscular body of good weight, good breadth to chest, stands tall on sturdy muscular legs, neat oval paws, tail of good shape & length is well covered & rexed. Short soft fine coat that could be a little denser covers her body, limbs & undersides completely and is well rexed in close waves. Shown in top condition, this shy, sweet & gentle lady ran winner closely but lost a point or two on her slightly longer wedge, well worthy of a Cert nonetheless – I wish I'd had two.

3rd McFadyen's GLENKENS NESS SPRITE. DRX n 33. 9 ½ months.

Immature as yet – basically of good type although her muzzle is a little fine still. In size she looks more like an overgrown kitten at the moment bless her & her coat has yet to develop. In good condition she handled well. Please bring her back when she has grown some more & her coat has come in.

DEVON REX UNTITLED MALE NEUTER. 6 present (+ 1 for BoB only).

1st PC & BoB & BOV

McFadyen's DEVILICIOUS CULDETHEL ELF. DRX ns. 14 months.

This gorgeous Black Smoke boy reminded me of the type of Devon I fell in love with back in 1981. A lovely long muscular neck supports a super short broad high cheek boned wedge that has a good strong muzzle & a well defined whisker break. Profile shows flat skull at forehead & between ears, strong stop, firm level chin & level bite. Fabulous large low set wide based ears of desired shape have tufted tips & muffs around the bases. Large lustrous eyes are well shaped, set & have that unique mischievous Devon expression. A youngster who is certainly fulfilling all his early promise is of very good size with a firm muscular body of good weight, nice broad chest, stands tall on sturdy muscular legs, neat oval paws, tail of

good shape & length is well covered & rexed. Delighted to see that he has lost all those guard hairs now that he has his adult coat which is short soft fine dense coat covers his body, limbs & undersides completely, is a little long down his spine but has super rexing in close deep waves. Shown in splendid condition, this cuddly bundle of love had no desire to go back in his pen whatsoever as he was quite happy in the arms of Lesley & me, thank you very much. Seeing him was the best birthday present I could have had. Thank you for entering him under me.

2nd WATSON's CLOUDBORN AEGON FTHREEL. DRX n. 3 years.

Short broad high cheek boned wedge carried on a lovely long muscular neck has a strong muzzle, well defined whisker break, crinkled whiskers & eyebrows are of medium length. Profile shows flat skull at forehead & between ears, stop could be stronger, firm level chin & level bite. Large low set wide based ears of desired shape have tufted tips. Expressive Primrose yellow eyes of good size are well shaped & set. Mature gentleman of very good size but carrying a trifle too many pounds today has a broad chest, stands tall on sturdy muscular legs, neat oval paws, tail of good shape & length is well covered & rexed. Short soft fine dense coat covers his body, limbs & undersides completely is well rexed but looks rusty from spending lots of time in the sun bless him. Shown in good condition, he was happier in his pen.

3rd WATSON's CLOUDBORN GORYS FTHREEB. DRX n. 3 years.

Similar to his litter brother reported on above but his muzzle isn't so strong & his ears are slightly higher set. His Primrose yellow eyes glared balefully at us. Now in his prime, he also is a little on the portly side but has good breadth to his chest, stands tall on sturdy muscular legs that have neat oval paws, tail of good shape & length is well covered & rexed. His brother must have been hogging the sunniest spots as this chap's coat is jet black, short, fine, soft, quite dense & is very well rexed in close waves. Shown in very good condition, he seemed to have been upset by neighbours in adjoining pens thus failed to do himself justice.

Also considered for BoB:

McWilliams's **Gd Ch & Gd Pr TAMORIE FANDABIDOZY FREDDY. DRX ns 24. 9 yrs, 1 mth.**

Super chap but petrified bless him, thus failed to show to his best advantage.

Puckrin's Pr ASSIYA CYBER ESPER 2 yrs, 9 mths. He has a super coat & rexing but his head is too long.

DEVON REX UNTITLED FEMALE NEUTER. 2 judged, 3 present (+ 2 for BoB only).

1st & PC WATSON's DADDYO BIG BERTHA. DRX f 22. 20 ½ months.

Short broad high cheek boned head set on a muscular neck that could be slightly longer is a little on the round side rather than wedge shaped but muzzle is strong, whisker break is well defined & she has short stubby whiskers & eyebrows. Profile shows rounding to brow, flat skull at forehead & between ears, good stop to short nose, firm level chin & level bite. Gorgeous low set ears have muffs around the bases & tufted tips. Large oval shaped hazel

eyes are well set & have that naughty Devon expression. Mature lady has weighty but muscular body that could be rather larger, she has a broad chest but her ample figure makes her muscular legs seem slightly short, her paws are oval & well shaped tail has good coverage, well rexed but is slightly short. Short soft fine dense coat with a lovely shine covers her body, limbs & undersides completely & is very well rexed in neat waves. Shown in very good condition she protested loudly at the indignity of being disturbed but once out on the trolley she was as good as gold, bless her.

2nd STEWART'S CHEREK COOKIE-CRUMBLES. 19 months.

In my book as a Black Smoke but is actually a Caramel Tortie (DRX k). A long muscular neck supports a high cheek boned wedge that I'd prefer rather shorter & slightly broader, her muzzle is quite strong with a well defined whisker break, her whiskers & eyebrows are short & wavy. Profile shows flat skull at forehead & between ears but the line from the bridge to the tip of her nose is almost straight lacking the required stop, firm level chin & level bite. Large wide based ears of desired shape are rather high set. Gorgeous green eyes of good size are well shaped, set & have that mischievous expression. Mature lady of very good size has weighty but muscular body, broad chest, stands tall on slim muscular legs, neat oval paws, tail of desired shape & good length is well covered & rexed. Coat that covers her completely is short, soft, dense & is well rexed but has quite a large number of guard hairs mixed in. Shown in very good condition she has the sweetest disposition & we had a lovely cuddle with her.

Also considered for BoB:

RITCHIE'S Pr NOBILERO DORCASMAGYAR, DRX ns. 6 yrs, 11 mths.

Report ends.
