

Lancashire Cat Club Show

14th March 2015

Dr Peter Collin

Many thanks to Chris and Janet for the invitation and to Cathy Robinson for her excellent handling and equally good company- look forward to November! I had a lovely full book and some lovely exhibits- thank you.

Black Kitten

1st and BOB Fisher's Xzibit Burnt Toast (BRI n) 14/7/14

Drop dead gorgeous! A lovely round head with very good breadth and depth and with a broad short muzzle of good width just looking a little square due to age and with good promising development to her cheeks. Very good width and rounding to the top of her head and neat ears of correct shape set fairly well apart. Round fairly large eyes are held well open and are orange in colour and she has a lovely British expression. Super neat profile with well rounded forehead and short straight broad nose which finishes in line with a fairly deep chin. Bite correct. Moderately large cobby body has good development to her chest and rump and with short straight legs and a thick medium length tail. Very nice coat with a short length and very good density and a firm texture. She is a jet black colour which is sound and with just a few shadow bars at present. A very promising friendly lady shown in excellent condition.

Cinnamon & Fawn Kitten Male

1st and BOB Collins's Farodell Saor Alba (BRI o) M 20/7/14

Beautiful size, substance and head type. Lovely round head of excellent width and depth and a short firm muzzle and full cheeks. Very good width and rounding to his top of head and with neat ears of correct shape and which are set well apart. Fairly large eyes are round except for a slightly flat top line and are a copper shade which actually blends with his coat colour! In profile very good rounding to his brow and a short straight and broad nose that finishes in line with a deep chin. Massive four square body is of very impressive size, proportions and muscularity with short straight and strong legs. Correct length and thickness to his tail which is correct shape except for a pointed tip. His coat is a touch long but of excellent density and a crisp texture. He is a warm cinnamon colour which is a little unsound but very forgivable in view of his other excellent attributes. A most impressive exhibit he handled very well.

Blue Kitten Male

1st and BOB Beard-Smith's Mewsos Chesney Hawkes (BRI a) M 2/7/14

A super chap with excellent British type and coat. He has a lovely round head with excellent breadth and depth and a short broad muzzle and with very good cheek development already. Very good width and rounding to the top of his head and neat ears are set well. They are correct shape except for a slightly broad base. His eyes are large and round and held well open and are orange in colour and he has a lovely British expression. His forehead is well rounded and he has a short straight and broad nose which finishes in line with a deep chin. Correct bite. His body is moderately large and cobby in shape with good breadth at his chest and rump and straight short legs and round paws. His tail is an excellent shape and thickness and medium length. His coat is fairly short and of excellent density and a crisp texture. He is a pale blue which is sound with minimal silvering and he is clear coated except for some shadow tail rings. He is a very promising chap who I look forward to meeting again I hope and was of a calm nature and shown in very good condition.

2nd Makdissey's Lilybeth Crush (BRI a) M 15/7/14

Lancashire Cat Club Show

14th March 2015

Dr Peter Collin

Unfortunately this friendly boy has a number of problems with his type. He has more of a short wedge shape to his head rather than a round appearance. He has fairly good width at his cheeks and fairly good depth of head. His muzzle is long and has a pointed appearance and he also lacks cheek development- this was exacerbated by him developing jowls behind them. Round top of head is of fair width and he has medium sized ears which are set a little high and have a broad base. Round eyes are held well open and are a good size but are a very pale gold in colour. In profile his forehead is rounded and he has a slightly long nose and a shallow chin which slips back. Correct bite. He has a cobby body which is currently oblong in shape rather than square. Straight fairly short legs. His tail is a little long but correct thickness. His coat is a little long and lacks density and has a firm texture. He is a dark blue colour which was sound and with minimal silvering and had some shadow barring. He was friendly and in good condition.

Blue Kitten Female

1st Wright's Bergors Ariella (BRI a) F 8/11/14

A very sweet girl of good British type. She has a round head with good breadth and very good depth and a short broad and blunt muzzle that fits in well and with some good promising fullness at her cheeks. Good rounding to the top of her head and fairly neat ears are a little high set at present. Medium sized round eyes are held well open and are copper in colour with a good British expression. In profile she has a well rounded forehead and a short straight and broad nose which ends in line with a deep chin. Correct bite. Cobby body with good proportions to her chest and rump and short straight legs and round paws. Her tail is an excellent medium length and shape. Her coat is slightly long but of good density and a firm texture. She is a pale blue which is sound with some slight silvering. She handled well and was in good condition and is again of promising type.

AOC Spotted Kitten

1st and BOB Chance's Surreptitious Peppa (BRI g 24) F 15/8/14

A fairly round head with fairly good width and good depth with a muzzle that is broad and a little square at present and with cheeks still to develop fullness. Good rounding to the top of her head and medium sized ears with a broadish base and ear tufts present which would ideally be set a little wider apart. Her eyes are large in size and are round except for a flatter top line and are copper in colour. In profile her brow is well rounded and needs a touch more nose break. Her nose is fairly short and straight and broad and finishes in line with a medium depth chin. Correct bite. She is medium in size but of good weight for size and is cobby if a little long in the back at present and stands a little tall on her strong legs with rounded paws. Her tail is medium and thick and of good shape. Her coat is moderately short and of fair texture density and firm texture. She is a mixture of dark blue and paler cream. She has an m shape on her forehead and several necklaces and facial tracings. She has leg bars and tail rings and spots on her feet. She has good spotting on her body and tummy with some minor linkage on her shoulders and flanks. She handled well and was in good condition.

AOC Silver Spotted Kitten Female

1st and BOB Mitchell's Chubbemup Amazing Galaxy (BRI bs 24) F 9/9/14

A pretty girl with a round head of very good breadth and depth and with a broad short muzzle of good width. Her cheeks are developing good fullness. Very good width to the top of her head with fairly neat ears of correct shape except for a broader base and which are set well. Her eyes are round and fairly large and held well open and are a

Dr Peter Collin

deep gold in colour with a good British expression. In profile her forehead is well rounded and her nose is short and straight and broad and finishes in line with a fairly deep chin. Correct bite. Her body has nice conformation with a broad chest and rump and strong straight legs. Correct length and shape to her tail. Her coat is fairly short and of good density and firm texture. Her ground colour is pale silvery chocolate and with pale milk chocolate markings. She has a very well nice well defined pattern with an M on her forehead and facial tracings and necklaces and barring to her legs and tail rings. Broken spine line and her spotting is very apparent on her body and tummy with only minor linkage on her shoulders. She is a promising exhibit and was of a friendly nature and shown in good condition.

AV Burmese Premier Female

1st and IGPC to Town's IMP GR CH & GR PR Teapot Tanya (BUR n) FN 23/2/05

Lovely style and type to this mature lady. Short wide wedge with very good width other cheekbones and tapering to a broad and blunt muzzle of very good width. Slightly flat top of head of good width and medium sized ears are of correct shape and set. Her eyes are of good size and correct shape with rounded bottom line and flatter top line and are green chartreuse in colour with a very good Burmese expression. In profile good depth of head and flat brow. Nose break is well defined and nose short and straight and ends in line with a medium depth chin. Body is good medium size and with good weight for size too. Her tail is medium in length and tapers to a rounded end with a fused tip. Medium length coat is of good satin like texture for her age and lies very well- puts paid to the idea that age leads necessarily to a plusher coat. Very nice warm mid seal brown colour. She handled well as long as we paid her the respect she deserves!

Blue Burmese Adult Female

BOB to Chapman-Bear's IMP GR CH Catamarian Evita (BUR a) F 13/8/10

A stylish and mature lady at her prime and of very good Burmese type. She has a lovely short balanced wedge and lovely expression. Very neat profile and superb coat for length texture and a very pleasing pewter blue. She is a real sweetie and always handles well.

Lilac Burmese Adult Male

1st CC and BOB to Bradley's Alba Regia Padlizan (BUR c) M 31/5/14

Super type and lovely colour of lilac. Balanced short wedge with excellent width at his cheekbones and tapering to a short broad blunt muzzle. Developing jowls since we last met. Excellent top of head with good rounding and very good width between his ears. His ears are moderately large in size and have a broad base and need a touch more rounding to the tips. Super eyes which are large and lustrous with a well-rounded bottom line and flatter top line angled towards his nose and are pale amber with yellow chartreuse inner rim. Good depth of head and nose break not as well defined as when seen a few weeks ago and short straight nose which finishes in line with a chin of good depth. Correct bite. Medium in size and good weight for size. Correct tail for shape and length. Medium length coat with lovely texture and which lies well. He is a lovely pale lilac with warm pink tones. He handled very well and was in very good condition. Very promising.

Lilac Burmese Adult Female

1st and CC McCormick's Floreat Serenissima (BUR c) F 24/5/14

Lancashire Cat Club Show

14th March 2015

Dr Peter Collin

A very pretty young female of very good type who I believe made champion today and is well worthy of the title. She has a short wedge with good width at her cheekbones and tapering to a short muzzle of good width. Very good rounding to the top of her head and medium sized ears of correct shape and set wide apart. Slightly heavy brow. Medium/large eyes of correct shape with well rounded bottom line and flatter top line angled towards her nose. In profile good depth of head. Lovely neat profile with rounded brow and well defined nose break and short straight nose which ends in line with a medium depth chin. Correct bite. Compact in size she is a good weight for size. Elegant legs and balanced tail of correct shape. Her coat is medium in length and has a good texture and lies well. She is a little creamy toned lilac at present which will I am sure change after the spring. She handled very well and is very promising.

AOC Tortoiseshell Burmese Adult Female

1st CC and BOB to Bradley's Alba Regia Penesz (BUR g) F 2/5/14

I really liked this young lady very much- very promising indeed. Lovely head with correct short wedge with excellent width at her cheekbones and tapering to a short blunt muzzle of good width. For me almost perfect proportions to the wedge. Very good width and rounding to the top of her head and good space between well set medium sized ears of correct shape. Her eyes are large in size and have a well rounded bottom line. The top line is actually composed of two arcs which is not ideal but still describes the flatter top line and is correctly angled towards her nose. They are amber in colour. In profile very good depth of head. Rounded brow and defined nose break. Short straight nose and in line medium depth chin. Correct bite. Medium/compact body of good weight. Nice feel to her. Elegant legs and correct tail. Her coat is a little longer than ideal on her back and generally of good texture but a little coarser where it is longer- needs a change of coat! Very nice pale silvered blue and pale cream. Clear coated and no white. She handled very well indeed.

Brown Burmese Neuter Female

1st PC and BOB to Bridge's UK & OG IMP GR CH Sanlis Shameless (BUR n) FN 12/11/10

Simply gorgeous is the first thing I wrote. Easily my BOV Burmese today. Lovely short wedge with excellent width at her cheekbones and tapering to a lovely short muzzle of very good width. Terrific balance to the wedge shape. Excellent rounding to the top of her head and very good width between medium sized ears of correct shape which are set to continue the outer line of her wedge. Largish eyes of very good shape with flat top line and rounded bottom line and are green chartreuse in colour and she has a super Burmese expression. In profile very good depth of head and with rounded brow and defined nose break. Short almost straight nose ends in line with a medium length chin. Correct bite. Medium sized and of good weight. Correct elegant legs and shape to her tail which balances. Medium length coat lies well and is of a good satin like texture. Super warm seal brown and is clear coated with no white. She is quite simply beautiful!

Blue Burmese Neuter Male

BOB to Hall's UK & IMP GR PR Sanlis Secret Samadhi (BUR a) MN 27/6/06

Handsome chap who I haven't seen for some time. Balanced short wedge of good width at his cheekbones and very broad blunt muzzle needing a touch more width at his cheekbones to balance. Top of head is of good width and slightly flat. Largish ears of correct shape are set well. Medium/large eyes of good shape and set and green

Lancashire Cat Club Show

Dr Peter Collin

chartreuse colour. In profile very good depth and a defined nose break and short straight nose and in line medium depth chin. Medium size and good weight. Correct tail and limbs. A clear coated darker phase blue with some silvering on the extremities. He is a total gentleman and handled well.
