

The BSH BAC wishes to address the current anomaly whereby some kittens are registered as XSH despite being born from two BSH parents. The principle has been agreed that unrecognised patterns and combinations are to be allowed to be registered with the appropriate breed number on the reference register with no progression. The current two examples brought to our attention involve Tabby and White and AC Silver Tipped Colourpointed.

The changes to the registration policy are shown below and the appropriate breed numbers detailed.

Page 15 of Registration Policy

13. Tabby & white, Tortie Tabby & white, Silver series & white (inc tabby & white and smoke & white cats) who are produced from two BSH parents can be registered with the appropriate breed number on the reference register with no progression.

14. AC Silver Tipped Colourpointed cats produced from two BSH parents can be registered with the appropriate breed number on the reference register with no progression
